Gentlemen:

An inspection of the building at the above named location revealed that the rear exit has several dead bolts on the door. Section 311.3.a.2 of the Municipal Code states, "All doors shall swing in direction of exit travel; shall be equipped with only such locks or latches at all times, whether persons are using the place of assembly or not, that all fastenings which would keep the door from opening may be instantly released from the inside without special knowledge or ability, merely by turning the customary knob or pressure on the customary thumb latch." Those dead bolts must be removed immediately.

It is also necessary that permits be taken out for the new signs on the premises. A plot plan showing where they are located, and how they are attached to the building will be needed when applying for the permits.

If you have any questions regarding these matters, please contact this office.

Very truly yours,

Marge Schmuckal
Building Inspector
