308-372 Capisic Street-1

September 20, 1949

Mr. George H. Stanford
R. F. D. #2
South Portland, Maine

Subject: Permit for construction of dwelling
and attached garage at 358-372 Capisic Street

Dear Sir:

The permit for the above work is issued herewith based on the plans filed with the application and subject to the following:

1. As discussed with you, the second floor joists over the dining room and kitchen are to run parallel with the front wall instead of from front to rear as do the rest of the second floor joists. Thus the partition between the kitchen and dining room will be non-bearing and may be constructed with 2x3 instead of 2x4 studs. The floor timber beneath the partition should be doubled however. Steps must also be taken to provide a tie across the building at the plate line for this part of the building.

2. Since the pitch of the dormer roof is to be less than 4" in 12", the dormer rafters must figure out to carry a live load of forty pounds per square foot. This the 2x8 rafters spaced 24" on centers will not do, but will do so if spacing is made not more than 20" on centers. With such a spacing the use of a ridge piece 2" thick will be necessary because the dormer rafters and those of the other side of the roof will not be directly opposite each other unless the spacing of all the rafters is made 20" on centers. If roof framing other than this is contemplated, approval should be secured from this office before any framing of rafters is started.

3. Since the finished grade of the ground at the rear of the building is apparently to be much lower than that at the front, care must be taken to make sure when foundation walls of both dwelling and garage are built that they are carried low enough at all points so that the bottom of the wall will be at least four feet below the finished grade.

4. The 8" top thickness of foundation wall shown in section on Sheet 1 of plans is not permissible except in such locations as where the finished grade will be far enough below the top of the wall to provide a thickness of at least 10" at the grade line. This condition may exist at some points along the rear wall, but along the front and side walls a much greater thickness than 8" at the top will be necessary to provide the required 10" thickness at the grade.

Very truly yours,

Warren McDonald
Inspector of Buildings

AJS/G

CC: Mr. Albert C. Hodson
R. F. D. #2, South Portland, Maine

11/15/57
P. L. B. 240 K.O.S.

WARNING !!!

THIS BUILDING PERMIT IS ISSUED
SUBJECT TO SEPCIAL CONDITION:

THAT NO CONCRETE SHALL BE Poured IN FOUNDATION FORMS AND NO
LAYING OF UNIT MASONRY IN FOUNDATION WALLS SHALL BE STARTED UNTIL
NOTICE HAS BEEN GIVEN AT THE DEPARTMENT OF BUILDING INSPECTION OF
READINESS TO START ACTUAL MASONRY WORK, AND UNTIL RE-CHECK OF
LOCATION HAS BEEN MADE BY INSPECTOR.

* * *

Original markings of corners of lot and especially stakes on
street line set by Dept. of Public Works must be kept intact and
easily accessible for re-check-- not covered by excavated earth
or building materials. Otherwise the "go-ahead" cannot be given.
Dept. of Public Works cannot re-set their stakes.

Obviously the notice for re-check must be given at such a time
as to allow reasonable opportunity to make re-check.

Warren McDonald
Inspector of Buildings
