

2286-2304 Congress St. (Lot #4)
National Cash Register

NATIONAL CASH REGISTER

Model 203-1R

CITY OF PORTLAND, MAINE
MEMORANDUM

TO: S. Worth Landers, Director Public Works
FROM: R. Lovell Brown, Director Building & Inspection Services
SUBJECT: In reference to National Cash Register building on Congress Street

DATE: 6-20-74

After my conversation with you today I dug out the file and find that the certificate of occupancy for the use of this building was given and issued on February 22, 1974. However, the contractor is an out of state contractor and I would advise you if you wish to have something done to address yourself to the National Cash Register people at 2286-2304 Congress Street, Portland and request whatever it is you wish to have done such as a culvert. As you know the Municipal Ordinances do call for water from premises not to cross the sidewalks or be dumped into the street unnecessarily, and I think you have a good leg to stand on getting a culvert.

Bob

R. Lovell Brown, Director Building
& Inspection Services

Lynn, Mass.

Gentlemen,

Permit to construct a one story office building according to plan is issued here with subject to the following building code requirements.

A separate permit issuable only to the actual installer is required for the installation of ventilation system.

Doors #1 and #34, according to the Section 614.41 of the building code, shall be equipped with vestibule latchsets or equivalent.

Section 836.5 requires that, "When masonry walls are veneered with brick, terra cotta, stone or concrete trim stone, the veneering shall be tied to the backing either by header for every 300 inches of wall surface, or by metal wall ties not less in thickness than wire of #6 gage, spaced not farther apart than 1' vertically and 2' horizontally."

The corridor walls are required to be of 3/4 hour fire-resistance with 1 3/4 inch solid wood core doors equipped with self-closing devices leading to the various offices and other rooms off the corridor.

The cleaning room at the extreme western part of the building, if it is to be classified as a hazardous room or a process room, it should be separated from other uses and occupancies by walls, floor, and ceiling of not less than two hour fire resistance with 1 1/2 hour fire doors or the approved labeled equivalent complying with article 9. The interior door opening shall be provided with non-combustible sills not less than 6" high and the room should be vented as required in Section 402. The floor shall be water-proofed and drained to comply with Section 473.

full rated ceiling type
A lighted exit sign should be provided over door #34 with a white light outside, these lights are to be on the same circuit.

Very truly yours,

Earl S. Smith
Plan Examiner

ESS:ms

Conti & Donahue, Inc.

Page 2

August 17, 1973

P.S.:

Section E & shows foundation less than 4' below grade. Inasmuch as it is supporting roof overhang, the foundation is required to extend at least 4' below grade.
