Re: DEP Application #S-013127-WD-X-C (Condition Compliance #17)
CORRECTEL COPY

Dear Mr. Foshay:

The Bureau of Hazardous Materials & Solid Waste Control has reviewed the information submitted by Regional Waste Systems (RWS) on September 8, 1993, September 30, 1993 and October 4, 1993 in accordance with Special Condition #17 of Department Order #L-013127-07-A-N, dated July 9, 1986, and issued pursuant to 38 M.R.S.A. Section 1301 et seq.

Condition #17 reads as follows:

Prior to the construction of cells one through nine the applicant shall submit the following information to the Department for review and receive approval from the Commissioner:

- A. Any changes in construction or operation necessitated by experience derived from the construction or operation of any of the previous phases;
- B. Construction drawings and specifications of the next phase to be constructed.
- C. A construction quality control program such as that described in Finding of Fact 13 above including all testing and inspection work that is being done.

In response to this condition, RWS has submitted: a Construction Documents Report by ABB Environmental Services, Inc. and dated September 1993; a letter dated September 30, 1993 from SCS Engineers summarizing the evaluation of landfill stability analysis to date; and a Preliminary Landfill Stability Evaluation by Haley & Aldrich. This evaluation reflects relatively low factors of safety, thus necessitating careful planning of future cell operations. Also, on October 4, 1993 RWS submitted: an upgrade of the erosion and sedimentation

control provisions and the pertinent specs of the Construction Documents Report; revised specifications requiring a minimum hydraulic conductivity spec of 1×10^{-2} cm/sec for the leachate collection drainage sand with sampling at a frequency of 1 sample per 5,000 cubic yards of sand placed; and a Construction Quality Assurance Plan including a scope of services, personnel qualifications, reporting requirements, and certification procedures.

As a result of its review, the Department has found that the information submitted on September 8, 1993, September 30, 1993, and October 4, 1993 satisfactorily addresses the requirements of Condition #17 of DEP license #L-013127-07-A-N to allow construction of Phases 3, 4, 5, and 6 of the Ashfill/Balefill. Prior to commencing operations in Cells 3, 4, 5, and 6 the applicant shall submit to the Department for review and receive approval of the following items:

1. A complete stability analysis report for the entire landfill;
2. An operational sequencing plan developed in conformance with the recommendations of the stability analysis report; and
3. As-built drawings and a final construction report certified by a Maine registered Professional Engineer.

If you have any further questions regarding this matter, please contact Carole Cifirino, the project manager, at 287-2651.

Sincerely,

Paula M. Clark, Director
Division of Solid Waste Facilities Regulation

re: 64 Blueberry Rd.

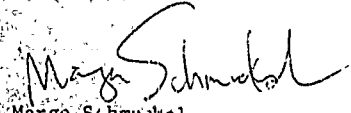

Dear Sir:

Your application to install sprinkler system as per plans at 64 Blueberry Rd. has been reviewed, and a permit is herewith issued subject to the following requirements:

1. Sprinkler plans must be approved by the State Fire Marshall.
2. Sprinkler system shall be installed according to NFPA 13.
3. Certification of sprinkler test shall be supplied to the Portland Fire Department.

If you have any questions regarding these requirements, please do not hesitate to contact this office.

Sincerely,

Marge Schmuckal
Asst. Chief of Inspection Services

CITY OF PORTLAND, MAINE
PLANNING BOARD

January 24, 1986

Mr. Charles Foshay, Executive Director
Regional Waste Systems
64 Blueberry Road
Portland, ME 040102

Jack D. Humeniuk, Chairman
Barbara A. Vestal, Vice Chairman
Harry E. Cumming
Jean E. Gilpatrick
John L. Barke
Joseph R. DeCourse
Michael J. Fento

Dear Mr. Foshay:

On January 21, 1986, the Portland Planning Board considered and approved the Regional Waste Systems request for site plan approval of the Resource Recovery Facility to be constructed on Blueberry Road. The approved facility includes a 47,164 square feet (ground floor) main building, several ancillary structures and parking for 36 cars.

Specifically, the Board voted (6-0-1, Fenton abstaining) that the plan is in conformance with Shoreland zoning regulations; voted (6-0-1, Fenton abstaining) to approve a waiver of curbs and sidewalks on Blueberry Road; and voted (6-0-1, Fenton abstaining) that the plan is in conformance with Site Plan Review Standards and Final Site Plan Approval, with the following conditions:

1. Architectural Development - The applicant shall continue working with Staff in the refinement of architectural design detailing of the scrubber, precipitator, and stack area of the building. Final design drawings shall be submitted to the City for review and approval prior to construction.
2. Site Engineering - Final design drawings shall be submitted to the City for review and approval prior to construction.
3. Landscaping and Mitigation Plan - comments of Carmela Barton, City Arborist, are attached. The applicant shall also coordinate the mitigation plan with the landscape plan for review and approval by the City.
4. Final DEP approval.
5. Electric Line - The applicant shall explore the possibility of locating the line underground along the proposed driveway. If, in the consensus of the City and applicant, this is not feasible or desirable, then additional buffering and landscaping shall be provided if clearing is required for the overhead transmission line.
6. Material Handling - The applicant shall amend previously submitted materials to clarify material handling procedures to insure that vehicles leaving the plant will not inadvertently spill or track waste materials.
7. Receipt of an executed Drainage Maintenance Agreement, acceptable to Corporation Counsel.

The approval is based on the submitted site plan and stated conditions. If you want to make any modifications to the approved site plan, you must submit a revised plan for staff review and approval. The Site plan approval will be deemed to have expired unless work on the development has commenced within six (6) months of the approval or within a time period agreed upon in writing by the City and the applicant. Building permits may be obtained from the Building and Inspection Division. If there are any questions, please contact the planning staff.

Sincerely,

Jack D. Humenluk

Jack Humenluk, Chairman
Portland Planning Board
