Mrs. Dorothy Berry
273 Cumberland Avenue
Portland, Maine

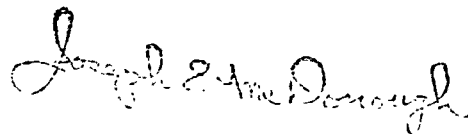

Re: Fire @ 271 Cumberland Avenue

Dear Mrs. Berry:

On Jan. 9, 1980 a fire occurred in the building listed above, of which you are reported to be the owner ().

If permanent repair work is required for this building, you must obtain a permit from the Building & Inspection Dept. in City Hall before starting such work.

Very Truly Yours,

Joseph E. McDonough
Chief
Portland Fire Department

cc: Building & Inspection Dept.
Corporation Counsel
Health Dept. (Housing Div.)
City Assessor's (Mr. Lacci)

NOTE: The fire was located on the first floor in a one room apartment.

Memorandum from Department of Building Inspection, Portland, Maine

PLUMBING SYSTEM

November, 1969

Location: #271-273 Cumberland Ave.

When such a system has been installed, the owner and lessee of the building are responsible for keeping the system in working order, at all times so that the system may always be on guard to warn the occupants of the building in case a fire starts. To discharge this responsibility and to have good assurance that he will not be held either financially or criminally liable in case of injury or loss of life in his building due to fire, it is my belief that the owner and lessee must see to it that the alarm system is tested every twenty-four hours. This may be done by merely pressing very briefly the test button to see if the bells ring loud and clear.

Most of these systems have dry batteries for their power, and the batteries will deteriorate in time so that they will not ring the alarm bells satisfactorily, if at all. If the batteries are used briefly by this test every day they will last longer than when tested less frequently.

Because this is a safety device whenever it is found that the bells do not ring loud and clear or any other defect appears in the system, the owner or his agent should notify immediately some predetermined party who has agreed in advance to come at once and service the system, whether day or night Sundays or holidays.

It is recommended that the name of such a party and the address and telephone number be posted permanently on or in the control box of the system.

Portland, Maine 04111

Re: 271-273 Cumberland Avenue
Portland, Maine

Dear Mrs. Berry:

As the result of an inspection of the 3-story wooden duplex structure on Friday, February 28, 1969, located at 271-273 Cumberland Avenue, reportedly owned by you and inspected by me, the following violations were found:

On the 271 side of the building there is only one inside stairway from the first to the third floor. The second means of egress from the two upper floors is reached by going through an apartment on the second floor and third floor rear to reach the outside wood fire escape.

On the 273 side of the building there is only one inside stairway from the first to the third floor. The second means of egress from the two upper floors is reached by going through a bathroom on the second floor and third floor rear to reach the outside wood fire escape.

This is a violation of the Safety Requirements of the City of Portland Municipal Code, Chapter 314, Section 1 which reads "All existing buildings and parts thereof in the City of Portland used for lodging house, tenement or apartment house, hotel, dormitory, convalescent or nursing home or home for children or for the aged shall be made to conform to the standards of safety established herein or better from the standpoint of safety to the occupants;"

Section 2. Subject to exceptions, allowances and additions hereafter provided, no less than two separate and distinct means of egress shall be provided for every occupant of all parts of buildings occupied for any use regulated herein.

Section 3. b. "Each required means of egress shall extend to a place of safety in the open air, shall, at all times, be kept free from obstruction, and shall be accessible to every person it is designed to serve."

C
O
P
Y

Due to the location of stairways, it will also be necessary for you to install an approved standard automatic fire detection and alarm system covering entire basement or cellar and sub-cellar, if any, all public and stair halls, all closets off halls or under stairs, all hazardous rooms and attached garages may be accepted to compensate for such location and arrangement of means of egress that a hazard involving one of them would be likely to make any other impassable or inaccessible.

The State of Maine Regulations Governing Exits In All Buildings Chapter 1, Section 10 FUNDAMENTAL REQUIREMENTS, Paragraph 1001 reads: "Every building or structure, new or old, designed for human occupancy shall be provided with exits sufficient to permit the prompt escape of occupants in case of fire or other emergency. The design of exits and other safeguards shall be such that reliance for safety to life in case of fire or other emergency will not depend on any single safeguard; additional safeguards shall be provided for life safety in case any single safeguard is ineffective due to some human or mechanical failure."

Before any alterations are made and the alarm system is installed, a permit must be obtained from the Department of Building Inspection, and be posted on the premises where the work is to be done.

Sincerely,

Samuel Cerber
Captain
Fire Prevention Bureau

RE: 271-273 Cumberland Avenue

Debbie Napolitano
Boulos Co.
2 City Center
Portland, ME 04101

Dear Ms. Napolitano,

This letter will confirm that 271 to 273 Cumberland Avenue is grandfathered as a 1 unit dwelling and 28 lodging rooms. City records indicate that this use existed prior to June 5th, 1957 when we adopted our Land Use Codes. This letter does not attempt to address any other codes which apply to the property such as (building, electrical, fire codes).

Sincerely,

William D. Giroux
Zoning Administrator
