389 CONGRESS STREET PORTLAND, MAINE 04101 (207) 775-5451

DEPARTMENT OF PLANNING & URBAN DEVELOPMENT

P. SAMUEL HOFFSES, CHIEF INSPECTION SERVICES DIVISION

September 30, 1988

Mr. Edward Miller 73 Birchvale Dr. Fortland, ME 04103

Dear Sir:

Your application to construct a  $18^{\circ}$  x  $24^{\circ}$  attached garage with family room over garage has been reviewed and a permit is herewith issued subject to the following requirements:

- 1. The foundation must be a minimum of 8" solid concrete front wall. Before foundation is placed, the Code Enforcement Officer must approve setback.
- 2. Your plan does not show the header size of garage door, a minimum of 3, 2"  $\times$  10" must be used.
- 3. Floor joist and rafters must be a minimum of 2" x 8",16" o.c.
- 4. Please read and implement items 4, 5, and 6 of the attached building permit report.

If you have any questions regarding these requirements, please do not hesitate to contact this office.

Chief, Inspaction Services

BUILDING PERMIT REPORT

A DOZING PROPERTY AND ONE
DATE 39/530 PT/88
ADDRESS: 73 Birch Vale DR
REASON FOR PERMIT: Garage addition with family
mam shave
BUILDING OWNER: MILLEY
CONTRACTOR: LANKIN BLOGERS.
PERMIT APPLICANT 1 (
APPROVED: *4×5 *6 DEMEND

### CONDITION OF APPROVAL OR DENTAL:

- 1.) All vertical openings shall be enclosed with construction having a fire rating of at least one(1) hour, including fire doors with self-closers.
- 2.) Each apartment shall have access to two(2) separate, remote and approved means of egress. A single exit is acceptable when it exits directly from the apartment to the building exterior with no communications to other apartment units.
- 3.) The boiler shall be protected by enclosing with one(1) hour fire rated construction including fire doors and ceiling, or by placing over the boiler, two(2) residential sprinkler heads supplied from the domestic water.
- Every sleeping room below the fourth story in buildings of Use Groups R and I-1 shall have at least one operable window or exterior door approved for emergency egress or rescue. The units must be operable from the inside opening without the use of separate tools. Where windows are provided as a means of egress or rescue, they shall have a sill height not more than 44 inches (1118 mm) above the floor. All egress or rescue windows from sleeping rooms must have minimum net clear openings of 5.7 square feet (0.53m<sup>2</sup>). The minimum net clear opening height dimension shall be 24 inches (610 mm). The minimum net clear opening width dimension shall be 20 inches (508 mm).
- In addition to any automatic fire alarm system required by Sections 1018.3.5, a minimum of one single station smoke detector shall be installed in each guest room, suite of sleeping area in buildings of Use Groups R-1 and I-1 and in dwelling units in the immediate vicinity of the bedrooms in buildings of Use Group R-2 or R-3. When actuated, the detector shall provide an alarm suitable to warn the occupants within the Individual unit (see Section 1717.3.1).

In buildings of Use Groups R-1 and R-2 which have basements, an additional smoke detector shall be installed in the busement. In buildings of Use Group R-3, smoke detectors shall be required on every story of the dwelling unit, including basements.

In dwelling units with split levels, a smoke detector installed om the upper level shall suffice for the adjacent lower level provided the lower level is less than one full story hellow the upper level. If there is an intervening door between the adjacent levels, a smoke detector shall be installed on both levels.

All detectors shall be installed in an approved location. Where more than one detector is required to be imstalled within an. individual dwelling unit, the detectors shall be wired in such a manner that the actuation of one alarm will counte all the allarms in the individual unit.

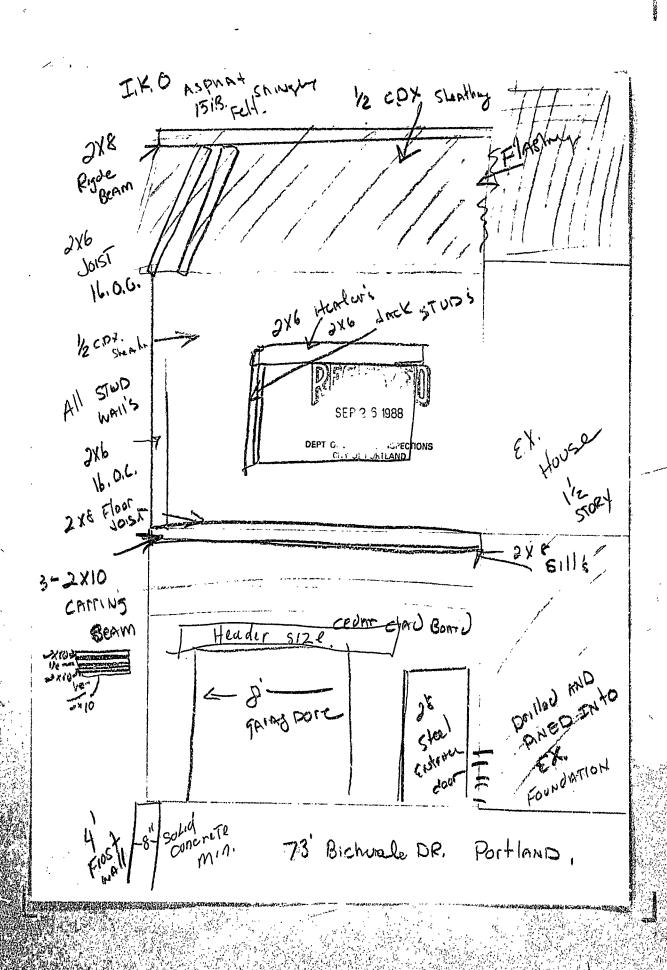

Private garages located beneath rooms in buildings of Use Groups R-1, R-2, R-3 or I-1 shall have walls, partitions, flours and ceilings separating the garage space from the adjacent interior spaces constructed of not less than 1-hour foreresistance rating. Attached private garages shall be completely separated from the adjacent interior spaces and the attic area by means out 11/2-inclu gypsum board or equivalent applied to the garage side. The sallis of all door openings between the garage and adjacent interior spaces shall be raised not less than 4 inches (102 mm) above the garage floor. The door opening protectives shall be 1 3/4-inch solid core wood doors or approved equivalent.

- 7.) A guardrail system located near the open side of deck or ellevanted walking surfaces shall be constructed. Guends in builldings of Ose Group R-3 shall be not less than 36 inches im height. Open guards shall have intermediate rails, balusters on on their comestruction such that a sphere with a diameter of 6 inches cannot pass through any opening.
- 8.) Section 25-135 of the Municipal Code for the City of Forthand states: "No person or utility shall be granted a permit to excavate or open any street or sidewalk from the time of Nowember 15 of each year to April 15 of the following year.

Sincerely

Samuel Hoffses Chief, Inspection Services
