

APPLICATION FOR AMENDMENT TO PERMIT

Amendment No. 11
Portland, Maine, October 29, 1952

PERMIT ISSUED

DEC 5 1952

CITY OF PORTLAND

To the INSPECTOR OF BUILDINGS, PORTLAND, MAINE

The undersigned hereby applies for amendment to Permit No. 52-1920 pertaining to the building or structure comprised in the original application in accordance with the Laws of the State of Maine, the Building Code and Zoning Ordinance of the City of Portland, plans and specifications, if any, submitted herewith, and the following specifications:

Location 284 Cumberland Avenue Within Fire Limits? _____ Dist. No. _____
Owner's name and address City of Portland Telephone _____
Lessee's name and address _____ Telephone _____
Contractor's name and address Fels Co., Inc., 42 Union Street Telephone 2-1939
Architect _____ Plans filed Yes No. of sheets 2
Proposed use of building School No. families _____
Last use _____ No. families _____
Increased cost of work _____ Additional fee .50

Description of Proposed Work

To install oil burning equipment in connection with existing steam heat

Name and type of burner Iron Fireman Labelled by Und. Lab. yes
Does oil supply line feed from top or bottom--top

Type of floor beneath burner--cement
Location of oil storage--coal bunker Number and capacity of tanks--2-6,700

Will all tanks be more than 5' from any flame--yes
Total capacity of any existing storage tanks for furnace burners--none

Permit Issued with Memo

Details of New Work

Is any plumbing involved in this work? _____ Is any electrical work involved in this work? _____
Height average grade to top of plate _____ Height average grade to highest point of roof _____
Size, front _____ depth _____ No. stories _____ solid or filled land? _____ earth or rock? _____

Copies to: Yels Company
Attn: Mr. Williams
42 Union St.,
Fred W. West
Supt. of Public School
Buildings
Lester V. Wallace,
Purchasing Agent

Gentlemen:

Amendment for building permit for alterations in boiler room of Portland High School at 284 Cumberland Ave., is issued to you, herewith, based on the instructions received over the telephone today from Fred W. West, Supt., of Public School Buildings, to the effect that he desired the new 5 inch brick wall to completely seal off the tanks from the balance of the former coal bunkers, that the pavement over the slab above the room is to be extended to seal-off the existing manholes so that there shall be no means of entering the vault, where the tanks will be, without breaking in either through the masonry wall now to be constructed or down through the top.

Very truly yours,
Warren McDonald
Inspector of Buildings

WMD/B

Messrs. West and Wallace:

While I cannot point out definitely any hazard which might be involved, and while it may not be any of my business, I certainly hate to see these two tanks sealed up in such a way that they cannot be reached except by breaking out permanent building construction. No one seems to know much about the hazards of a tank vault like this, but it does seem certain that it will be desirable to get at these tanks and perhaps before any long time has elapsed. The situation here is not the same as at Deering High School, because I think the tanks at Deering High School can be reached down through the former manholes through the roof of the bunkers. At least I was told that brick walls were built between the tops of the tanks and the under side of the slab at the manholes.

This department is confronted merely by the Underwriters' regulations, which do not require any means of entering the vault but stipulate that if an entrance is provided from within the building, the opening shall be covered by a labelled fire door and "provision shall be made for adequate ventilation of such enclosures prior to entering for inspection or repairs on tanks". It is hoped that every possibility may be explored before these tanks are completely sealed in to see if some arrangement cannot be made so that the vault can be easily entered in case of need and some type of adequate ventilation provided for with suitable warnings for those who might enter. It is even possible that your ventilation equipment would be able to...

Manually operated gravity ventilation might be
described adequate - however, the manual

Memorandum from Department of Building Inspection, Portland, Maine
284 Cumberland Avenue--Installation of boilers at Portland High School by Fels Co., Inc.

October 24, 1952

Permit for installation of two steam boilers only as replacements for existing boilers is issued herewith, but not including the installation of oil burners and fuel oil tanks because there is not sufficient information on the application to establish compliance with the Building Code.

When this additional information is received including the arrangement of tanks and fireproofing, the sketch showing these details should be filed at this office and application for amendment to the permit now issued - and the amendment approved and secured before that part of the work is started.

CC: Fred M. Kest, Supp.
Public School Buildings

June 20, 1983

Mr. Peter Wovkonish
370 Mitchell Road
Cape Elizabeth, Maine 04107

Dear Sir:

Your application to make alterations to 223 A & 225 Cumberland Avenue, Portland, Maine, has been reviewed and a building permit is herewith issued subject to the following fire and building code requirements:

1. Section 312 of the building code states "When a building is occupied for two or more uses, not included in the same use group" (Yours, restaurant use group A-3, offices use group B, and dwelling units use group R-2.) "One of the following shall apply."
 1. The provisions of the code applying to each use shall apply to such parts of the building as come within that use group; and if there are conflicting provisions, the requirements securing the greater public safety shall apply to the entire building.
 2. The mixed uses shall be completely separated both horizontally and vertically by fire separation walls and floor/ceiling assemblies having a fire resistance rating corresponding to the highest fire grading prescribed in table 1402 for the separate uses. Each part of the building shall be separate uses. Each part of the building shall be separately classified to use.

Table 1402 states A-3 use groups will have a fire grading of 2 hours. This means all wall, floors and ceiling of the restaurant will be 2 hr. rated separating it from the other use groups. Also use group B is required to be the same as A-3.

If you have any questions on these requirements, please call this office.

Sincerely,

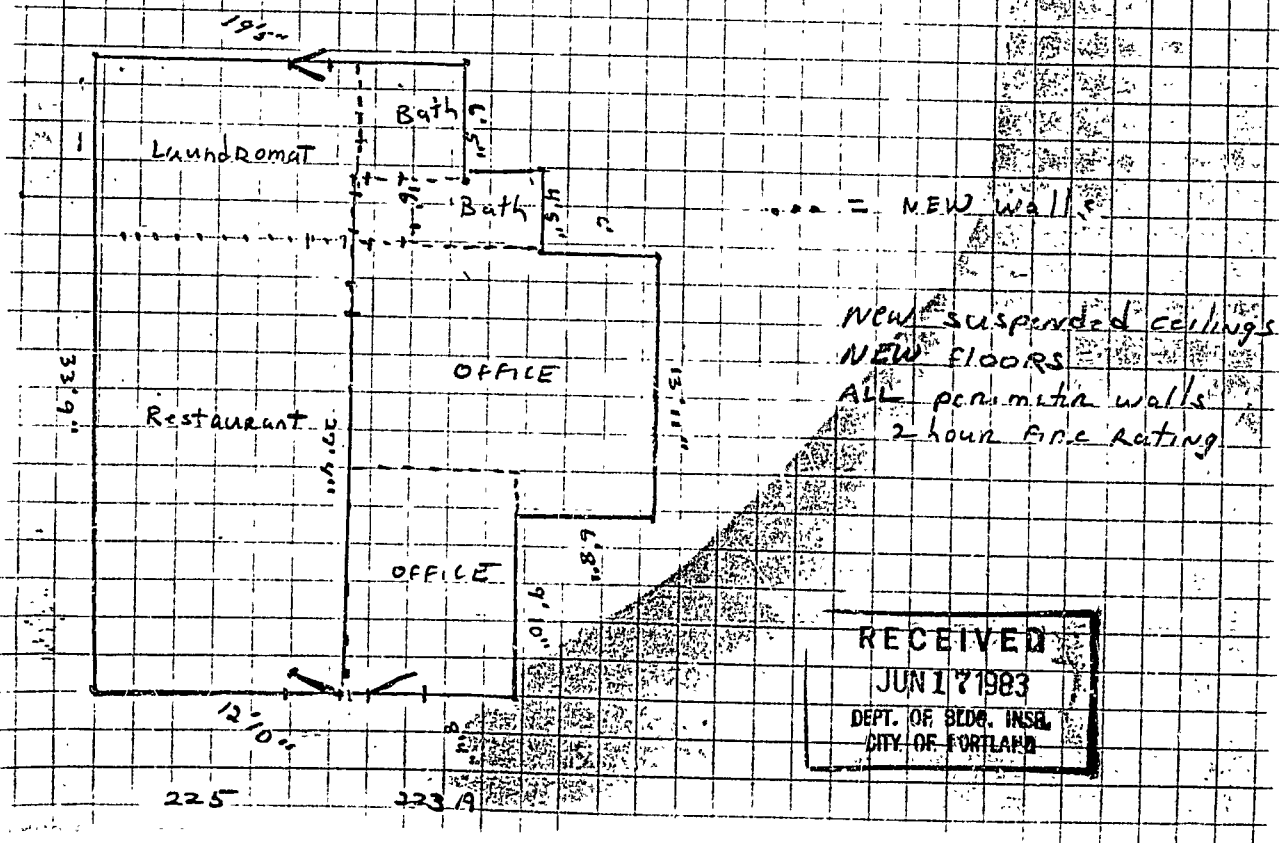

P. Samuel Hoffses
Chief of Inspection Services

Lawrence C. Butler Sr.
79 Falmouth Street
Portland, Maine 04103

Re: 471-473 Cumberland Avenue

Dear Mr. Butler:

A recent inspection was made by Code Enforcement Officer Burt MacIssac of the property owned by you at 471-473 Cumberland Ave. Portland, Maine. As a result of the inspection, you are ordered to correct the following conditions that exist: Unlawful Change of Use

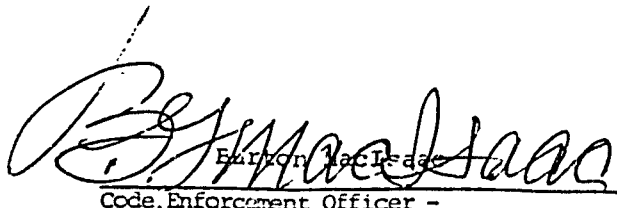

103.2 Change in use: It shall be unlawful to make any change in the use or occupancy of any structure or portion thereof which would subject it to any special provisions of this code without approval of the building official, and the building official's certification that such structure meets the intent of the provisions of law governing building construction for the proposed new use and occupancy, and that such change does not result in any greater hazard to public safety or welfare.

The above mentioned conditions are in violation of Section 103.2 of the 1981 BOCA Building Code, and must be corrected on or before February 26, 1984. Failure to comply with this order will result in a complaint being filed for prosecution in District Court.

Please contact this office if you have any questions regarding this notice.

Very truly yours,

P. Samuel Horvath
Chief of Inspection Services

Burt MacIssac
