September 2, 1936

Googins & Clark
46 Portland Street
Portland, Maine

Gentlemen:

You have furnished no location plat showing the distances that the proposed two story addition for Mr. Kitchen at 805 Brighton Avenue will be from the side property line, from the rear property line, and from Harmon Road. This information is necessary so that we may check against the zoning law.

A statement of design, like blank attached, filled in and signed by the actual designer is required to be attached to the plans or the design plan covering the design of the structural steel beam under the second floor.

When the work is completed you will have a garage attached to one part of the dwelling house and beneath another part of the same dwelling house. With relation to private garages combined with dwelling houses, the Building Code has to say, in part: "Floors of all such adjoining garages shall be of concrete or equally fireproof and impervious materials." You have shown a wooden floor in the garage. What substitution do you desire to make to satisfy the law?

The present garage to be relocated and enlarged is perhaps of the usual garage construction, -double 2x4 or 4x4 corner posts, 2x4 studs, 24 inches on centers, and perhaps a single 2x4 plate. If they exist, these details will not satisfy the requirements for a two story structure. The corner posts are required to be 4x6 solid, the 2x4 studs not more than 16 inches from center to center, the window openings will require double 2x4 headers, at least, with jack studs under each end.

Fire resistance, which you have indicated to be metal lath and plaster will be required over the entire area of the garage side of the wall between the garage and the dwelling in the first story, except at the doorway and it may be omitted between the doorway and the outside corner. The entire ceiling over the garage is to be covered with similar material.

May we have this information promptly, so that we may be able to check the location and issue the permit when it comes back from the Fire Chief whose approval is required.

Very truly yours,

Inspector of Buildings
