Signature of owner Lung M. Mantin

AP- 41-43 Eailey Avenue

July 26, 1961

Mr. George M. Marston 43 Bailey Avenue

Dear Fr. Marston:

Building permit for construction of a one story addition 14 feet by 26 feet on rear of your dwelling at the above named location is issued herewith subject to the following conditions as discussed with hrs. Marston:

- 1. A system of mechanical ventilation satisfactory to the City Flumbing Inspector is to be installed for the bathroom. A separate permit issuable only to the actual installer is required for the installation of this system.
- 2. A metal duct having a cross sectional area of at least 50, square inches and extending through the roof and capped by a wind driven ventilator in to be installed for ventilation of the kitchen.
- 3. The 6x6 sills are to be either of full size hemlock or of dressed Douglas Fir lumber. Sills are to be anchored to the concrete plans, which are to be no less than 9 inches in diameter and are to extend not less than 4 feet below and 6 inches above grade.
- 4. Floor joists are to rest on top of the sills and are to have a row of lx3 cross bridging at the center of the span.

Very truly yours,

Albert J. Sears Building Inspection Mirector

AJS:m

AP- 41-43 Bailey Avenue

July 25, 1961

Mr. George M. Marston 43 Bailey Avenue

Dear Mr. Marston:

Check of your application to construct a one-story sun porch 14 feet by 26 feet on rear of your dwelling at the above named location discloses that by construction of the addition the existing bathroom and kitchen will be left without windows opening directly to the outside air and thus will be in violation of Section 212-d-1.2 of the Building Code. Therefore a provit cannot be issued for construction of the addition unless some means of ventilation for these rooms is to be provided.

As far as the bathroom is concerned, the City Plumbing Inspector informs me that he would be able to accept a system of mechanical ventilation for that room with the switch operating the fan in the system connected to that operating the electric light in the room. In regard to the kitchen, if the partition between the diming room and kitchen were to be removed, the windows in wall of dining room can be considered as serving the kitchen area also; or, since the area of the kitchen is less than 70 square feet, a metal duct at least 50 square inches in area extending through the roof of the building and capped by a wind driven ventilator would be acceptable. Cross connection of vents for kitchen and bathroom are not allowable.

Unless the 6x6 sills indicated are to be of full size hemlock or dressed Douglas Fir lumber, they will not figure out on the 62 foot spans indicated. Please furnish information as to how you propose to care for all of these details so as to comply with Buildir Code requirements.

Very truly yours,

Albert J. Sears Adding Inspection Director

Ms. Mary C. Marston 43 Bailey Avenue Portland, Maine 04103

Re: 43 Bailey Avenue

Dear Ms. Marston:

You did not give enough information in order for us to give a definite answer in regards to opening a gift shop.

What is the exact location of the proposed gift shop? It must be in a Susiness Zone. You would have to come to this office, Room 317, City Hall, to apply for a permit for a Change of Use which has a \$25.00 fee.

Bring a plot plan showing building on the lot and parking and floor plan showing exits and layout.

Sincerely,

Malcolm G. Ward Zoning Enforcement Officer

MGW/jmr
