Description: Two old junk cars on property and others.

NOTES: Neighbors think cars are for sale and also repairing being done.

4/1/64 - Two old cars parked in vacant lot
beside existing two car garage. No "For Sale"
signs in evidence and no evidence of any repair
work being done. E.S.S.

4/2/64 - Letter to owner - J.S.

4/13/64 - Work done - Cars removed. E.S.S.

U-E.S.S. 4-13-64

Cplt.64/27 22 Bailey Ave.

April 2, 1964

Mrs. Erlene G. Roman
22 Bailey Avenue

Dear Mrs. Roman:

An inspector from this department reports that there are two unlicensed cars parked on lot beside your dwelling at the above named location, and it has been reported that repairing of motor vehicles is being done there. The dead storage of motor vehicles and the repairing of motor vehicles other than those lawfully parked or stored on the lot is unlawful under the Zoning Ordinance in the R-3 Residence Zone in which the property is located. The Zoning Ordinance also limits to three the number of motor vehicles (only one of which may be a commercial motor vehicle such as a truck) that may be lawfully parked on the premises at any one time either outside or inside of a building.

We are calling this matter to your attention so that you may have an opportunity to have corrected any violations existing at this location. It is hoped that we may have your cooperation in this matter so that further action by this department may not become necessary.

Very truly yours,

Albert J. Sears
Building Inspection Director

INSPECTION COPY

AP 44 Orchard Avenue

November 20, 1952

Mrs. Julia Gorham
44 Orchard Avenue
Portland, Maine

Copies to: Scribner & Iverson with permit to
61 Union Street replace steam
boiler
Callard Oil & Equipment Co.,
135 Marginal Way

Dear Mrs. Gorham:

Probably after your recent harrowing experience with your steam boiler, this letter is unnecessary, but I would like to make sure that you realize the importance of having an automatic low water cut-off installed when your new boiler is set in and the oil burner arranged to serve it.

After our telephone conversation about the situation, perhaps you understand what this safety control does. It saves apartment in the case of your boiler that through some cause all of the water ran out or was evaporated from the boiler. If your heating plant had been equipped with one of these low water cut-offs, when the water in the boiler reached a predetermined low level, the oil burner would have been shut off automatically and the trouble and danger avoided.

Like all automatic arrangements some attention should be given to this low water cut-off device regularly—an attention which can hardly be afforded by anyone except the owner of the building. This servicing consists merely of flushing the water out of the low water cut-off control once or twice a month to make sure that corrosion and sediment do not affect the device so that it would not be operative. Usually the instructions for this servicing are attached right to the device, and should be left so attached so that all will know the need.

Very truly yours,

Warren McDonald
Inspector of Buildings
