cc to: Robert Magill  
37 Bailey Avenue

Gentlemen:

Permit to construct enclosed breezeway and 2-car garage 22'x33'-10" onto side of dwelling is being issued subject to plans received with application and in compliance with Building Code restrictions as follows:

1. There shall be a foundation (9 inches in diameter if cylinder piers are used) at least four feet deep under the 4x6 inch posts that support the header for the breezeway.
2. The entire foundation wall for the breezeway shall have a concrete footing at least eight inches thick and at least ten inches wide or this foundation wall may be at least 8" top and 10" bottom without a footing.

Very truly yours,

A. Allan Scule  
Inspector

37 Bailey Avenue

Dear Mr. Magill:-

Building permit for construction of a one story wood frame shed 6 feet by 8 feet for storage of garden tools on lot with your dwelling at the above location is issued herewith subject to the following conditions.

1. Sills are to be 4x6, all one piece in cross section, instead of the 2x6 indicated in application for permit.

2. Floor joists either are to rest on top of the sills or notched over 2x3 nailing strips spiked to the sides of the sills.

Very truly yours,

Albert J. Sears  
Deputy Inspector of Buildings

streets are not accepted be sure that all of the separate house lots have an identifying number on the development plan filed here and instruct your foreman to use these lot numbers or street numbers always when referring to a particular house in connection with this office. We have had some confusion and difficulty in this connection in the past, and naturally we are much more able to serve quickly those who are willing to cooperate in some systematic arrangement.

Very truly yours,

Inspector of Buildings

cc: Mr. Webb

182 Middle Street

Mr. A. O. Armitage  
25 Mitchell Road  
Co. Portland 7, Maine

37-57 Bailey Avenue-11

March 25, 1946

Mr. Clarence J. Gray  
3 Whitehall Avenue  
So. Portland 2, Maine

Dear Sir:

We are issuing to you as contractor building permits for seven new single family dwelling houses in the Webb Development on Bailey Avenue, based on your architect's standard plans filed here according to street and number locations as follows:

Street Locations	Standard Plans
37-39 Bailey Avenue	No. 1
41-43 " "	No. 2A
45-47 " "	No. 3
51-53 " "	No. 2A
55-57 " "	No. 4
61-63 " "	No. 2A
65-67 " "	No. 5

Note that on standard plans No. 3 and 5, corner posts of the 4-foot by 8-foot front porch are shown as 2x3 where at least 4x4 or doubled 2x4 is required as per Section 511 Schedule of timber sizes of the Building Code.

Also note on these plans that the 4x8 plates shown on spans of four feet and 2x6 rafters 16 inches on centers on spans of four feet are much stronger than required by the Building Code, but are of course allowable. If you want to change the size of these members, however, please notify this office in writing or by a revised plan so that our standard plans may be kept up to date and difficulties may not arise on the job.

No doubt you are aware of the requirements of law for notice to this office of readiness of closing-in any part of any of these buildings and of the requirement that no part is to be closed in until the work has been inspected and our certificate of closure (green tag) left at the particular house involved. Also, of the requirement of notice to this office of readiness for final inspection when all features controlled by the Building Code have been completed. Owner, who is receiving a copy of this letter, should particularly bear in mind that the dwellings are not to be occupied for living quarters until the certificate of occupancy for each has been issued from this department following a final inspection which shows everything in order as far as Building Code and zoning Ordinance regulations are concerned.

Note also that separate permits from this department are required for the installation of the heating plants--a separate permit to each system--and these permits are to be applied for by and are issuable only to the actual installer of the heater.

Your cooperation will not only be appreciated but you will also get better service from this department, especially when calling up to notify of readiness for inspection, if you will have the architect show the entire plat plan of the development and identify all of the lots proposed to be built upon by the official street numbers wherever the streets are accepted (these numbers may be ascertained by consulting the assessor's plan or consulting department of public works plan) and any of the
