File: Rept. 9573B-I

June 18, 1937

Mr. Roy C. Fitts,
Braintree Street,
Portland, Maine

Dear Sir:

Upon inspection of your dwelling house at Lots 141-142 Braintree Street by an inspector from this office with the Plumber Inspector, it was found that you have not fully strengthened the building as yet.

A 4x8 girder is to be placed under the first floor to replace a two inch plank and iron pipe columns at least four inches in outside diameter are to be set with plates on top of them and securing a good bearing on a good foundation for the bottoms of the pipes, not more than six feet from center to center beneath the 4x8. The 4x8 girder is to be set with the six inches dimension upright. Several floor timbers which are spliced are to be replaced with new floor timbers all one length and a cast iron cleanout door and frame is to be provided at the bottom of the chimney flue.

Under the circumstances we are unable to issue the building permit covering the relocation of the rear entrance door and cutting in a new window, until these matters have been fully taken care of. In the meantime it is not permissible for you to proceed with any of the work intended to be covered by the permit. If you will notify this office as soon as the above mentioned work is completed, we will make another inspection, and, if everything is found in order, will issue the permit for which you have applied.

In addition to the above the Plumbing Inspector was to have your plumber clear up questions of the details of connections of the sewer to the septic tank and also of the bath tub connections.

Please be governed accordingly.

Very truly yours,

McD/H

Inspector of Buildings

 Final Inspn. 1/11/38
 Cert. of Occupancy issued None

NOTES

There is a question on my mind about the work here in finishing up this house, if permit cover all changes.
 6/16/37 - Several parts of foundation wall have been rebuilt and a new concrete block + bricks work finished. I wanted all around building. A 4x6 girder to replace a 2" wide girder. I was clear. Fitts agreed to have girder put up on edge with 4" iron pipe columns

interior with a c.c. for support. Clearcut door to be provided in chimney. New sewer has been run to septic tank. But plumber inspector is to straighten out with plumber details of connection to tank and also of bath tub connected up. Several floor timbers which are spliced are to be replaced. A.G.
 6/24/37 - New 4x6 girder flatways has been put beside existing 3x8 girders and new iron columns with iron plates put in to support both girders with a maximum span of 6'. Clearcut door put in chimney.

$$\begin{matrix} 8 \times 3 \text{ on } 6' \text{ span good for} \\ 2 \times 1100 \times \frac{8}{16} \times 3 = 4100 \\ 3 \times 6 \times \frac{8}{16} \times 3 = 1125 \\ \hline 3075 \end{matrix}$$

$$\begin{matrix} 6 \times 4 \text{ on } 6' \text{ span good for} \\ 2 \times 1100 \times \frac{8}{16} \times 3 = 4100 \\ 3 \times 6 \times \frac{8}{16} \times 3 = 1125 \\ \hline 5225 \end{matrix}$$
