NOTES

July 28, 1927

Frank B. Weston
1872 Washington Avenue
Portland, Maine

Dear Sir:

Referring again to your application for a building permit to make alterations to your combined stable and private garage at 1872 Washington Avenue, this permit has been referred to the Chief of the Fire Department whose approval is required by law before the permit may be issued.

The Chief of the Fire Department states that he is unable to approve this permit because there is one horse and hay kept in the same building, and the existing conditions with only two cars stored in the building are considered by him hazardous so that he is unwilling to place his approval upon the existing conditions by approving the proposition of increasing the number of cars stored in the building.

Under these circumstances, I am unable to issue to you the building permit even though your appeal to the Municipal Officers were successful.

I am, therefore, requesting the City Clerk that he withhold your appeal until further instructions are received from you. As far as this department is concerned, it is necessary to deny your permit, and it is therefore unlawful for you to proceed with any of the work. The fee which you paid for the permit will be refunded if you will return the receipt for the same to this office on or before August 10th, 1927.

Very truly yours,

Inspector of Buildings

Copy to:
E. A. Smith
City Clerk

WJ/P

original

There is one house in
the building and
hay which creates
a hayrack condition.
Two cases a 2 feet
here now and while
we can not stop this
very easily, but we
can not improve
of the efficiency of condition
by approving of their
behavior
J. S.

C.T.S.

This is the garage
that I spoke to you
about. An appeal
has been made but
if you are going
to object there is
~~no need of carrying~~
it to the Municipal
officers.

— 2007/2/27

July 16, 1927

Frank C. Huston
1872 Washington Avenue
Portland, Maine

Dear Sir:

Referring to your application for a building permit to make alterations to your private garage at the above address, there seems to be some misunderstanding as to the number of automobiles which you propose to accommodate on this property.

When Mrs. Huston made the application at this office, she stated that the building at present was used for a one car private garage, and that it was proposed to use the building for a two car private garage. That part of the application blank pertaining to garages which gives information which we are compelled to have in order to tell whether or not the work will comply with the Zoning Ordinance, was not filled in. Upon telephoning Mrs. Huston to secure the necessary information concerning the number of cars to be accommodated, we were informed that it was intended to keep three automobiles in this building. Will you be kind enough to inform us precisely how many cars this building has habitually accommodated in the past, and how many you would now like to accommodate in the building after the alterations are made?

This question has quite a vital bearing upon the enforcement of the Zoning Ordinance, and it is necessary that we establish the correct condition before we are able to do anything with the permit. In the meantime, it is unlawful for you to proceed with any of the work until the permit card is actually in your possession and posted upon the premises.

Yours truly,

Inspector of Buildings

BUILDING PERMIT REPORT

DATE: 16/Nov/87

ADDRESS: 1560 Washington Ave. 77120

REASON FOR PERMIT: Finish space above garage into bedroom and add a bathroom.

BUILDING OWNER: Ronald Le Blanc

CONTRACTOR: owner

PERMIT APPLICANT: owner

APPROVED: [Signature] DEWEEB

CONDITION OF APPROVAL AGREEMENT:

- 1.) All vertical openings shall be enclosed with construction having a fire rating of at least one(1) hour, including fire doors with self-closers.
- 2.) Each apartment shall have access to two(2) separate, remote and approved means of egress. A single exit is acceptable when it exits directly from the apartment to the building exterior with no communications to other apartment units.
- 3.) The boiler shall be protected by enclosing with one(1) hour fire rated construction including fire doors and ceiling, or by placing over the boiler, two(2) residential sprinkler heads supplied from the domestic water.
- * 4.) Every sleeping room below the fourth story in buildings of Use Groups R and I-1 shall have at least one operable window or exterior door approved for emergency egress or rescue. The units must be operable from the inside opening without the use of separate tools. Where windows are provided as a means of egress or rescue, they shall have a sill height not more than 44 inches (1118 mm) above the floor. All egress or rescue windows from sleeping rooms must have minimum net clear openings of 5.7 square feet (0.53m²). The minimum net clear opening height dimension shall be 24 inches (610 mm). The minimum net clear opening width dimension shall be 20 inches (508 mm).

In addition to any automatic fire alarm system required by Section 1018.1.5, minimum of one single station smoke detector shall be installed in each guest room, suite or sleeping area in buildings of Use Groups R-1 and I-1 and in dwelling units in the immediate vicinity of the bedrooms in buildings of Use Group R-2 or R-3. When actuated, the detector shall provide an alarm audible to warn the occupants within the individual unit (see Section 1017.3.1).

In buildings of Use Groups R-1 and R-2 which have basements, an additional smoke detector shall be installed in the basement. In buildings of Use Group R-3, smoke detectors shall be required on every story of the dwelling unit, including basements.

In dwelling units with split levels, a smoke detector installed on the upper level shall suffice for the adjacent lower level provided the lower level is less than one full story below the upper level. If there is an intervening door between the adjacent levels, a smoke detector shall be installed on both levels.

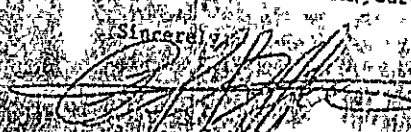

All detectors shall be installed in an approved location. Where more than one detector is required to be installed within an individual dwelling unit, the detectors shall be wired in such a manner that the actuation of one alarm will actuate all the alarms in the individual unit.

*6.) Private garages located beneath rooms in buildings of Use Groups R-1, R-2, R-3 or I-1 shall have walls, partitions, floors and ceilings separating the garage space from the adjacent interior spaces constructed of not less than 1-hour fire-resistance rating. Attached private garages shall be completely separated from the adjacent interior spaces and the attic area by means of 1/2-inch gypsum board or equivalent applied to the garage side. The sills of all door openings between the garage and adjacent interior spaces shall be raised not less than 4 inches (102 mm) above the garage floor. The door opening protection shall be 1-3/4-inch solid core wood doors or approved equivalent.

7.) A guardrail system located near the open side of deck or elevated walking surfaces shall be constructed. Guards in buildings of Use Group R-1 shall be not less than 36 inches in height. Open guards shall have intermediate rails, balusters or other construction such that a sphere with a diameter of 6 inches cannot pass through any opening.

8.) Section 25-135 of the Municipal Code for the City of Portland states: "No person or utility shall be granted a permit to excavate or open any street or sidewalk from the time of November 15 of each year to April 15 of the following year."

Sincerely,

Daniel J. ...

RE: 1872 Washington Avenue

Mr. Bruce M. Jordan
1872 Washington Avenue
Portland, Maine 04103

Dear Sir:

Your application to construct an addition (second floor) at 1872 Washington Avenue has been reviewed and a permit is herewith issued subject to the following requirements:

1. Your plan shows 2" X 6" rafters; a minimum of 2" X 8" is required for a 13' run.
2. Please read and implement items 4 and 5 of the attached building permit report.

If you have any questions regarding these requirements, please do not hesitate to contact this office.

Sincerely,

A handwritten signature in dark ink, appearing to read "P. Samuel Hoffses".

P. Samuel Hoffses
Chief of Inspection Services

BUILDING PERMIT REPORT

DATE: 11/0ct/68

ADDRESS: 1872 Washington Ave.

REASON FOR PERMIT: second floor addition

BUILDING OWNER: Bruce Jordan

CONTRACTOR: owner

PERMIT APPLICANT: ''

APPROVED: *4*5 DENIED

CONDITION OF APPROVAL OR DENIAL:

- 1.) All vertical openings shall be enclosed with construction having a fire rating of at least one(1) hour, including fire doors with self-closers.
- 2.) Each apartment shall have access to two(2) separate, remote and approved means of egress. A single exit is acceptable when it exits directly from the apartment to the building exterior with no communications to other apartment units.
- 3.) The boiler shall be protected by enclosing with one(1) hour fire rated construction including fire doors and ceiling, or by placing over the boiler, two(2) residential sprinkler heads supplied from the domestic water.

~~X(4.)~~ Every sleeping room below the fourth story in buildings of Use Groups R and I-1 shall have at least one operable window or exterior door approved for emergency egress or rescue. The units must be operable from the inside opening without the use of separate tools. Where windows are provided as a means of egress or rescue, they shall have a sill height not more than 44 inches (1118 mm) above the floor. All egress or rescue windows from sleeping rooms must have minimum net clear openings of 5.7 square feet (0.53m²). The minimum net clear opening height dimension shall be 24 inches (610 mm). The minimum net clear opening width dimension shall be 20 inches (508 mm).

X(5.) In addition to any automatic fire alarm system required by Sections 1018.3.5, a minimum of one single station smoke detector shall be installed in each guest room, suite of sleeping area in buildings of Use Groups R-1 and I-1 and in dwelling units in the immediate vicinity of the bedrooms in buildings of Use Group R-2 or R-3. When actuated, the detector shall provide an alarm suitable to warn the occupants within the individual unit (see Section 1717.3.1).

In buildings of Use Groups R-1 and R-2 which have basements, an additional smoke detector shall be installed in the basement. In buildings of Use Group R-3, smoke detectors shall be required on every story of the dwelling unit, including basements.

In dwelling units with split levels, a smoke detector installed on the upper level shall suffice for the adjacent lower level provided the lower level is less than one full story below the upper level. If there is an intervening door between the adjacent levels, a smoke detector shall be installed on both levels.

All detectors shall be installed in an approved location. Where more than one detector is required to be installed within an individual dwelling unit, the detectors shall be wired in such a manner that the actuation of one alarm will actuate all the alarms in the individual unit.

- 6.) Private garages located beneath rooms in buildings of Use Groups R-1, R-2, R-3 or I-1 shall have walls, partitions, floors and ceilings separating the garage space from the adjacent interior spaces constructed of not less than 1-hour fire-resistance rating. Attached private garages shall be completely separated from the adjacent interior spaces and the attic area by means of 1/2-inch gypsum board or equivalent applied to the garage side. The sills of all door openings between the garage and adjacent interior spaces shall be raised not less than 4 inches (102 mm) above the garage floor. The door opening protectives shall be 1 3/4-inch solid core wood doors or approved equivalent.
- 7.) A guardrail system located near the open side of deck or elevated walking surfaces shall be constructed. Guards in buildings of Use Group R-3 shall be not less than 36 inches in height. Open guards shall have intermediate rails, balusters or other construction such that a sphere with a diameter of 6 inches cannot pass through any opening.
- 8.) Section 25-135 of the Municipal Code for the City of Portland states: "No person or utility shall be granted a permit to excavate or open any street or sidewalk from the time of November 15 of each year to April 15 of the following year."

Sincerely,

P. Samuel Hoffses

1872 Washington Ave.

Mr. Bruce M. Jordan
1872 Washington Avenue
Portland, Maine 04103

Dear Mr. Jordan:

This is in reference to your recent application for a building permit for an addition to your existing building at 1872 Washington Avenue. In order to grant approval to your application, we need to have a plot plan showing in a rough sketch the setbacks from the proposed addition and the existing building, the front side and rear setbacks will be from the lot lines.

This plot plan will show whether or not the proposed building addition will meet the setbacks which are required by the City Zoning Ordinance in the R-2 Residence Zone

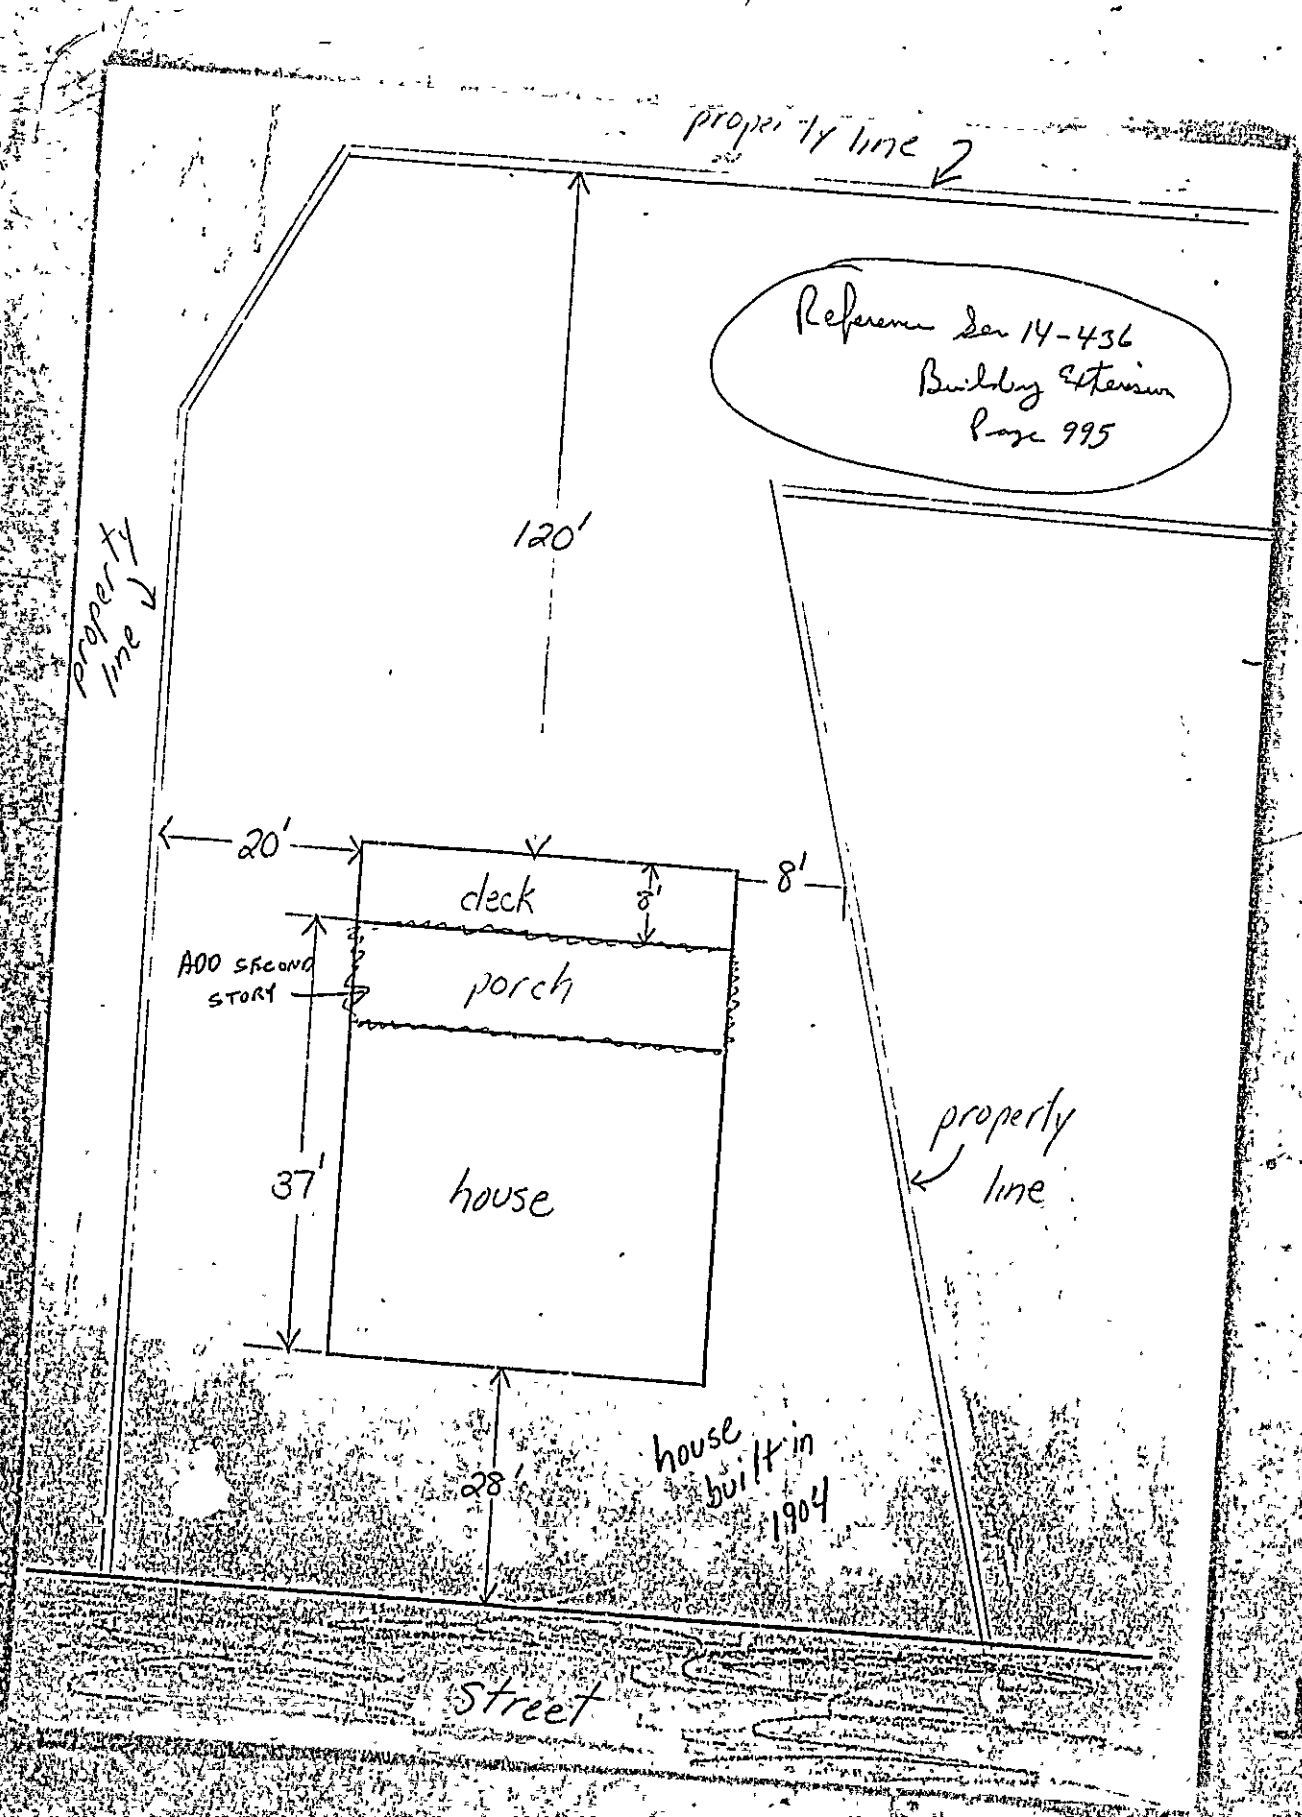

Based upon a recent amendment, these setbacks are front: 25 feet, side yard: 12 feet for one story; rear yard: 25 feet; two story: 14 feet, as adopted by the Portland City Council on July 19, 1988.

Please furnish a plot plan so that we may verify that the setbacks, as required at the time your residence was built are complied with, in view of your proposed addition to the building.

Sincerely,

Warren J. Turner
