RE: Lot 84 Allison Avenue (Deering Run Subdivision)

Dear Mr. Winslow:

Recent inspection of the above-referenced property revealed construction in progress. To date, no calls for inspection have been received by this office.

The dwelling in question does not appear to have any relation to the plans filed with this office (Permit No. 87-1214), the property lines are not marked, and the setbacks do not match the plot plan.

I have been unsuccessful in trying to reach you for the past several days and am forced to put a STOP WORK order on this job. (Section 113.3 - Compliance with permit; Section 113.4 - Compliance with plot plan -- BOCA Building Code)

Please contact me as soon as possible regarding this job. I may be reached at 775-5451 ext. 378 between 8-9 a.m. and 2:30-3:30 p.m.

Please note that all work must stop on this job and that a stop work order removal fee must be paid. I am hoping we can clear this matter up as soon as possible.

Thank you for your cooperation.

Sincerely,

Kathleen A. Taylor
Code Enforcement Officer

BUILDING PERMIT REPORT

DATE: 17/sept/87

ADDRESS: LOT 284 Deering Run (Allison Ave.)

REASON FOR PERMIT: Construct a single family dwelling with attached garage.

BUILDING OWNER: Sewco Inc.

CONTRACTOR: 11

PERMIT APPLICANT Winstlow

APPROVED: *5*6 DENIED

CONDITION OF APPROVAL OR DENIAL:

- 1.) All vertical openings shall be enclosed with construction having a fire rating of at least one(1) hour, including fire doors with self-closers.
- 2.) Each apartment shall have access to two(2) separate, remote and approved means of egress. A single exit is acceptable when it exits directly from the apartment to the building exterior with no communications to other apartment units.
- 3.) Each apartment shall be equipped with an approved single station smoke detector powered by the house current. The detector shall be located in an area which will provide protection for the sleeping areas.
- 4.) The boiler shall be protected by enclosing with one(1) hour fire rated construction including fire doors and ceiling, or by placing over the boiler, two(2) residential sprinkler heads supplied from the domestic water.
- 5.) Every sleeping room below the fourth story in buildings of Use Groups R and I-1 shall have at least one operable window or exterior door approved for emergency egress or rescue. The units must be operable from the inside opening without the use of separate tools. Where windows are provided as a means of egress or rescue, they shall have a sill height not more than 44 inches (1118 mm) above the floor. All egress or rescue windows from sleeping rooms must have minimum net clear openings of 5.7 square feet (0.53m²). The minimum net clear opening height dimension shall be 24 inches (610 mm). The minimum net clear opening width dimension shall be 20 inches (508 mm).

- *6.) In addition to any automatic fire alarm system required by Sections 1716.3.2 and 1716.3.3, a minimum of one single station smoke detector shall be installed in each guest room, suite of sleeping area in buildings of Use Groups R-1 and I-1 and in dwelling units in the immediate vicinity of the bedrooms in buildings of Use Group R-2 or R-3. When actuated, the detector shall provide an alarm suitable to warn the occupants within the individual unit (see Section 1717.3.1).

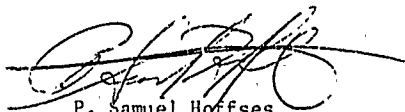

In buildings of Use Groups R-1 and R-2 which have basements, an additional smoke detector shall be installed in the basement. In buildings of Use Group R-3, smoke detectors shall be required on every story of the dwelling unit, including basements.

In dwelling units with split levels, a smoke detector installed on the upper level shall suffice for the adjacent lower level provided the lower level is less than one full story below the upper level. If there is an intervening door between the adjacent levels, a smoke detector shall be installed on both levels.

All detectors shall be installed in an approved location. Where more than one detector is required to be installed within an individual dwelling unit, the detectors shall be wired in such a manner that the actuation of one alarm will actuate all the alarms in the individual unit.

- 7.) Private garages located beneath rooms in buildings of Use Groups R-1, R-2, R-3 or I-1 shall have walls, partitions, floors and ceilings separating the garage space from the adjacent interior spaces constructed of not less than 1-hour fire-resistance rating. Attached private garages shall be completely separated from the adjacent interior spaces and the attic area by means of 1/2-inch gypsum board or equivalent applied to the garage side. The sills of all door openings between the garage and adjacent interior spaces shall be raised not less than 4 inches (102 mm) above the garage floor. The door opening protectives shall be 1 3/4-inch solid core wood doors or approved equivalent.

Sincerely,

P. Samuel Hoffses
Chief of Inspection Services

RE: Lot #84 Deering Run (Allison Avenue).

Dear Sir:

Your application to construct a single family dwelling with an attached garage has been reviewed and a permit is herewith issued subject to the following requirements:

1. All lot lines and the lot shall be clearly marked before calling for a foundation inspection.
2. Please read and implement items 5 & 6 of the attached work sheet.

If you have any questions regarding these requirements, please do not hesitate to contact this office.

Sincerely,

P. Samuel Hoffses
