AP 36 Brook Road-I

August 13, 1948

Mr. Frank Williams,
36 Brook Road
Portland 5, Maine

Subject: Permit for construction
of one-car wood frame garage
at 36 Brook Road

Dear Sir:

The permit for the above work is issued herewith. In order to locate the building where you wish it to be, one front corner of the garage will be closer than five feet to your dwelling. It is understood that, as specified by the Building Code, the inside faces of the studs wherever the walls are closer than five feet to the dwelling will be covered from sill to roof boarding with sheets of asbestos and cement at least $\frac{3}{8}$ " in thickness with the joints cemented or with plaster or metal or perforated Gypsum lath. The permit is issued on the basis that this will be done.

Very truly yours,

Inspector of Buildings

AWS/S

CC: Mr. Martin Bartley
Cumberland Center, Maine

STATEMENT ACCOMPANYING APPLICATION FOR BUILDING PERMIT

for 1-car garage Date 8/10/48
at 36 Brook Road

AquaMaid STEEL

AquaMaid® galvanized steel pool wall panels, .075 inches thick are fabricated from corrosion resistant, zinc-coated 14 gauge galvanized steel from major steel mills. Straight wall panels include full 5" flange, top, bottom and sides. Intermediate and long wall panels are strengthened with two triple-bend upright supports for peak strength.

WALL PANELS:

Standard, adjustable 'A frame' supports are manufactured from heavy galvanized 12 gauge steel with exclusive "cold welded" adjustable heads. Provides true wall alignment and anchors pool walls at all stress points.

SUPPORT SYSTEM:

All hardware features zinc plating for maximum corrosion resistance.

HARDWARE:

WALL PANELS

Steel wall types to suit the needs and budget of any prospective pool buyer. All are constructed to provide superior performance and surpass expectations.

ADJUSTABLE A FRAMES

Strong adjustable steel support braces anchor pool walls and allow for true wall alignment.

'X-LOCK' DECK SUPPORT

Truss-style optional cement deck braces are recommended to equalize inward deck pressure and outward water pressure.

COPING

Attractive non-skid surface of cement receiver, Rac, or universal Feature Strip aluminum coping provides a beautiful picture frame effect.

LADDER MOUNT

Added support and accurate ladder positioning are made possible with optional ladder mount.

SKIMMER SUPPORT

To sustain the weight of the skimmer and provide support before and after back-filling, AquaMaid pools are equipped with a rugged skimmer support.

SKIMMERS

Molded non-corrosive plastic skimmer is standard on all AquaMaid pools. Keo water surface free of debris.

LINER PATTERNS

Choose from a variety of pattern/print durable premium vinyl liners manufactured of .0225 mil U.S. virgin vinyl with built-in micro-organism retardant.

INLET FITTINGS

Fully adjustable wall fittings direct filtered water flow for proper circulation.

LADDERS

Stainless steel pool ladders allow ease of entry and exit from any pool.

STEPS

An optional feature that adds a gleaming entrance to a pool and provides an area for sitting, relaxing or just cooling off.

HANDRAILS

For maximum safety and classic elegance, pool steps are complemented by bright, stainless steel handrails.

SLIDES

For real fun consider the addition of a quality slide available in many sizes and shapes.

DIVING BOARD

The most popular pool option is the diving board offering many hours of fun for all.

POOL CLEANERS

Installation of an automatic pool cleaner can help eliminate regular hand vacuuming.

UNDERWATER LIGHTS

This magical mood-setting option will make evening pool side entertainment a special event.

POOL BASE

Depending on local ground conditions, pool base material provides a lasting pool bottom surface.

FILTERS

AquaMaid pools are equipped with high performance, non-corrosive sand or diatomaceous earth filtration systems.

PUMPS & MOTORS

An efficient, corrosion proof, self-priming pump is an integral part of our total filtration system.

VALVES

Unique multi-position valve controls all filter operations with a simple turn of the handle.

HEATERS

Now, highly efficient gas and oil heating systems are available, as well as the popular solar blankets to retain heat in pool water.

SAFETY LINES

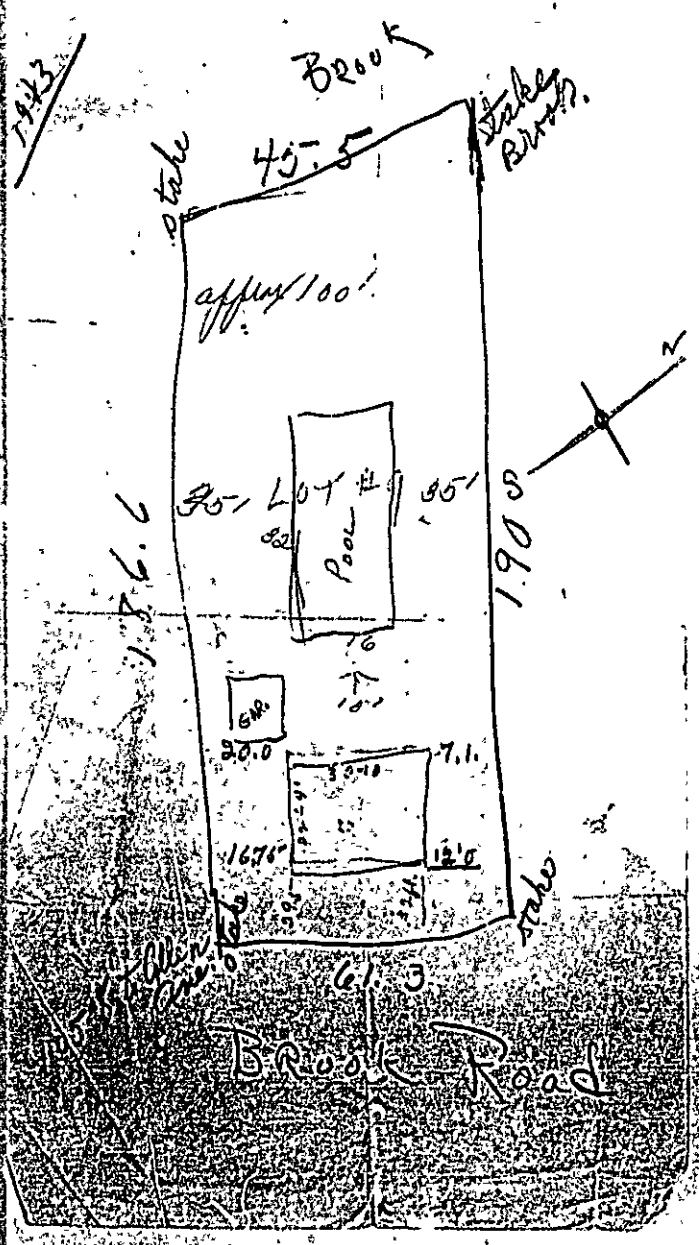

A major safety feature is the addition of a safety float line which divides the shallow area from the deep end.

MAIN DRAIN

To maximize water flow and circulation, a main drain can be added during installation at bottom of deep end.

WALL FOAM

Long-lasting foam sheathing applied to pool walls insulates and cushions vinyl liner for added protection.

36 Brook Road
Portland, Maine 04103

Re: 36 Brook Road

Dear Ms. Sinnett:

Your permit to install a 16 x 32 inground pool at 36 Brook Road as per plans on file in this office, is being issued with the following requirement:

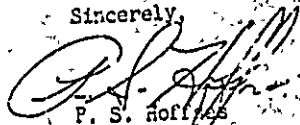

- (1) Section 627.9 Swimming pool safety devices: Every person owning land on which there is situated a swimming pool, which contains 24 inches or more of water depth at any point shall erect and maintain thereon an adequate enclosure either surrounding the property or pool area, sufficient to make such body of water inaccessible to small children. Such enclosure, including gates therein, must be not less than 4 feet above underlying ground. All gates must be self latching with latches placed 4 feet above underlying ground. All gates must be self latching with latches placed 4 feet above the underlying ground and otherwise made inaccessible from the outside to small children.

A natural barrier, hedge, pool cover or other protective device approved by the governing body may be used so long as the degree of protection afforded by the substituted devices or structures is not less than the protection afforded by the enclosure, gate and latch described herein.

- (2) Electrical and plumbing permits must be obtained.

If you have any questions on these requirements, please call this office.

Sincerely,

P. S. Hoffes
Chief of Inspection Services

APPLICATION FOR SUBMETER

RECEIVED

JUL 11 1984

DEPARTMENT OF PUBLIC WORKS

For Sewer User Charge Adjustments

The undersigned hereby requests permission to install additional water meter(s) in accordance with Section 24-76(C) of the Portland City Code:

It is understood that all expenses related to the purchase, installation and maintenance of the meter(s) is to be borne by the applicant.

To be Completed by Applicant

Address where sub-meter is requested 36 Brook Road - Portland, ME 04103

Property owner name ANNE B. STINNETT

Tax Map Reference (on Real Estate Tax Bill) 10017 SE 375-C-11

Property owner address 36 Brook Road - Portland, ME

Person to be contacted to schedule inspections PAUL BEOTE 773-1085
(Name and Telephone Number)

Portland Water District Acct. No. (on bill) D-75-23080

Billing Name & Address (on bill) ANNE B. STINNETT - 36 Brook Rd
Portland, ME 04103

Location and size existing Portland Water District Service Meter 5/8" ϕ

BASEMENT front of house

Proposed location and size of sub-meter 5/8" ϕ with 1/2" ϕ fittings
on water line to outside faucet.

Will a remote reading register be utilized? NO YES (If yes, state location)

Outside side of house near driveway

Description of proposed changes in plumbing required for submetering:

Cut in submeter into
water line to outside
faucet.

The volume of water to be submetered can be shown not to enter the sewerage system by virtue of its use for:

Filling pool, other
outside uses.

Sketch plan showing proposed changes in plumbing and the location of existing and proposed meters. Show water flow through submeter to non-discharge equipment or location (use additional sheet of paper if necessary)

I certify the above information is true and correct:

Date

INSTRUCTIONS

First - The applicant is to complete front of this form. The Tax Map Reference can be found on your Real Estate Tax Bill directly following owners name and address in the center of your Property Tax Bill. Billings name and address should be copied from your water & sewer Bill as well as the Portland Water District Account Number which is in the lower left corner of the water and sewer Bill.

Second - Mail completed application form to:

City of Portland
Dept. of Public Works
404 City Hall
Portland, Maine 04101
ATTN: MR. SCOTT COWGER

Third - The Public Works Department will call the person indicated on front side to schedule pre-installation inspection. During this inspection the Public Works section of this form (below) will be completed. Following this inspection Public Works will make copies of the application form. If the application is approved 3 copies will be made, one will be mailed to the Portland Water District, one will be forwarded to the City Plumbing Inspector and one will be mailed back to the Applicant. If the application is denied, one copy will be made and mailed to the applicant showing reason for denial.

Fourth - Upon receipt of a copy of the approved application, the applicant can purchase and install the sub-meter as approved. Following installation the applicant - his plumber must call the Chief Plumbing Inspector at 775-4433 Ext. 353 for an inspection of the completed installation. Following inspection by the Chief Plumbing Inspector, the Water District will be requested to arrange to have an automatic reading system (if applicable - See General Information sheet) furnished where by the volume shown by the submeter charge credits will be given until the Plumbing Inspector has approval of the installation.

GENERAL INFORMATION

Section 21-761C of the Portland City Code reads as follows:

"**Submeters of Water Volume.** Any person who feels that recorded water records are not a reliable index of his discharge volume may install an additional water meter of a type approved by the Public Works Authority to measure the volume of water which can be shown not to enter the sewerage system. The person installing such a meter shall immediately notify the Public Works Authority of such installation and shall be responsible to the Public Works Authority for reporting meter readings not less often than every three months. Such person shall be credited with the volume charges for the volume shown by such meter, which meter shall be accessible for reading by the City or its agents at all reasonable times."

The City and the District have arranged to relieve the customer from the reporting responsibility required above if both meters can be read simultaneously by the District meter readers during their regularly scheduled visits to read the pre-existing service meter. This can be accomplished by locating the sub-meter directly adjacent to the pre-existing service meter or by equipping the sub-meter located elsewhere with a remote reading register located so both readings can be made at the same time.

Approved meters are Neptune and Rockwell meters conforming to the following specifications:

1. shall meet or exceed IMAA accuracy test requirements and be accompanied by a certificate of test accuracy.
2. the meters will have straight radius, cubic foot registers.
3. the meters will have the meter number stamped into the main case.
4. the meters shall be magnetic drive.
5. shall have either a rotating disc or oscillating piston.
6. shall have a bronze case.

Approved meters are available from the Water District which sells them for the price the District pays them from the manufacturers. If you wish to purchase a submeter from the District you must bring your copy of an approved application with you at time of purchase.

TO BE COMPLETED BY PUBLIC WORKS

Pre-installation inspection by Scott Cowger
on July 11, 1984

Automatic reading system requested YES NO

A Watts No. 8A N.F. Back Flow Preventer or equal shall be installed on the hosebib of the outside sillcock.

Application Approved Denied

Comments _____

TO BE COMPLETED BY THE PLUMBING INSPECTOR

An inspection of the completed installation of the submetering system approved on this application was conducted on 7-11-84
by Ernold R. Goodwin, Chief Plumbing Inspector of the City of Portland.

The submetering system was installed as approved.

No cross connections were found.

The installation is approved dis-approved

Ernold Goodwin
