Referring to my letter of December 21, 1970 have the white lights been installed outside each door over which there is an exit skyn and have the outside platforms been provided as per letter and sketch sent to me by Mr. Bowdler on December 29, 1970?

If this work has not been done would you please see that it is done in the very near future so that this office may issue a certificate of which the owner is entitled when all of the work has been doupleted.

Very truly youre,

Mr. E.G. Johnson 3 Cliff Street Portland Maine

Universalist Church new building, Allen Avenue, South Portland, Maine

Dear Mr. Johnson:

Concerning the above mentioned project, and following our conversation on Mr. Earle Smith's letter of 21 Dec 70, would you please let me have your price quotations for the following extra work:

- 1. Supply and install white exterior electric lights outside each of three doorways the two back doorways to the senctuary and the one doorway at the end of the classroom cooridor. Each shall be switched through the existing interior exit lights appropriately. Have the Electrical Sub-contractor a class with me the type and quality of the lamp fixture.
- 2. At same three doorways supply and install for each one a step built in accordance with the enclosed drawing number S9. I would appreciate it if you could provide an alternate price for doing the same job in smooth concrete in order to give the owner an option of choice.

Yours sincerely,

Michael C. Bowdle

Re: 524-542 Allen Ave.

December 21, 1970

Universalist Church of Portland 712 Stevens Avenue cc: E. G. Johnson & Co. 3 Cliff St. cc: Michael C. Bowdler 169A Ocean St., So.Port.

Gentlemer:

A final inspection of this building made this date reveals the following Building Code discrepancies must be cleared up before this office is able to issue the Certificate of Occupancy required by laws

- 1. White lights are required outside each door over which there is an oxit sign so that during the night hours the exit rath will be lighted. These white lights to be switched with the exit light.
- 2. There is a six or eight inch stepdown outside these exit doors which must be eliminated. A platform at least as high as the threshold and as wide as the door swing shall be provided at these locations to eliminate this immediate stepdown.

Very truly yours,

Earle S. Smith Plan Exeminer IFW-

oct. 21, 1970

Universalist Church of Portland oc to: Michael C. Bowdler, 169A Ocean St.S.P.
712 Stevens Avenue cc to: Edward McLaughlin, 26 Upland Ave

Gentlemen:

A final inspection of the church building at the above address reveals the following Building Code discrepancies which must be corrected before this office is able to issue the certificate of occupancy required by law before the building is occupied.

- There are no white lights outside three of the exit doors, two in the sanctuary and the one at the end of the long halisay.
- 2. There does not appear to be enough air to support combustion in the boiler room. The temperature appeared to be excessive and the opening in the outside wall is not large enough. There should be some method of relieving the heat generated by the boiler.

Very truly yours,

Mr. Robert Brown: att: Mr. Alan Soule. City Building Inspector City Hall Portland Maine

Universalist Church of Portland, Allen Avenue, Portland, Maine

Dear Mr. Brown:

In accordance with your Mr. Soule's request on the above mentioned project enclosed for this building are:

- 1. Car Park layout plan
 - 2. Kitchen layout plan
 - 3. Sanctuary seating layout plan

The General Contractor for the job will be depositing withtyou a copy of the shop drawing for the laminated beamsaand this includes a certificate of design.

On the kitchen layout the exact circumstances are not yet known as the church committee are presently considering change orders involving change from gas to electric cooking; and the change is fairly certain to be made. On the range hood the adderning drawing sheet S3, enclosed, shows its design. Also the design may be modified slightly to be in accordance with the regulations of both departments of the city concerned with this feature. The modification will be shown on the shop drawings now being prepared and I will let you have a copy as soon as possible.

Enclosed also is a copy of the addenda schedule to the project.

Thank you for your cooperation in precessing the building permit in good time

Yours sincerely,

Milad C. Pamiller

Portland,712 Stevens Ave.

Dear Mr. Bowdlor:

Building permit to construct a 1-story frame church 37'x85'x44'x44' is being issued subject to plans received with the application and in compliance with the Zoning Ordinance and Building Gode restrictions as follows:

- 1. The plot plan for this church will need to show parking gor at least 16 vehicles (3 x16 per space) as required by section 602.148.11 of the Zoning Ordinance. We understand that the sanctuary will have no fixed seats, therefore this requirement.
- Proposed seating arrangements that may be desired.
- 3. We would suggest that you check with the State Insurance Separtment, State House, Augusta, Maine for their regulations on exits
- 4. The laminated beams requires that the manufacturer furnish a statement of design and compliance certificate in the manner specified in the Building Code. Section 1503.2.12.2, a copy of which is enclosed, we will need this information before the beams are put into place.
- for the kitchen to be provided within the church, see enclosed guide

Very truly yours.

MEMORANDUM FROM DEPARTMENT OF BUILDING INSPECTION, PORTLAND, MAINE

August, 2570

Locations #524 Allen Ave.

Before tanks and piping are covered from view, installer is required to notify the Fire Lept. Headquarters of readiness for inspection and to refrain from covering up until approved by the Fire Dept. Headquarters

These tanks of 1050 gallons capacity are required to be of steel or wrought iron no less in thickness than # 10 gauge; and before installation are required to be protected against corrosion, even though galvanized, by two coats of tar, asphaltum, or other suitable rust-resisting paint, and special protection wherein corrosive soil such as cinders or the like.

Pipe lines connected to underground tanks, other than tubing and except fill lines and test wells, must be provided with double swing joints arranged to permit the tank to settle without impairing the efficiency of the pipe connections.

Owner and installer will have to bear the responsibility for the structural capacity of the tank to support loads from above such as heavy motor trucks.

If tank will be so located as to be subjected to the action of tide water or "ground" water, adequate anchorage or weighting must be provided to prevent "floating" when tank is empty or nearly so.

APPLICATION FOR PERMIT FOR HEATING, COOKING OR POWER EQUIPMENT

PERMAL LOUIS

CITY of PORTLAND

Portland, Mains, August 5 1970

To the INSPECTOR OF BUILDINGS, FORTLAND, ME. The undersigned hereby applies for a permit to install the following heating, cooking or power equipment in accordance with the Laws of Maine, the Building Code of the City of Portland, and the following specifications:
Location 524 Allen Ave. Use of Building Church No. Stories New Building Name and address of owner of appliance Universalist Church of Portland, 712 Stevens Ave. Installer's name and address Edwin W. McLaughlin, 26 Upland Ave. Telephone
General Description of Work To install Oil-fired forced hot water heating system.
IF HEATER, OR POWER BOILER
Location of appliance first floor boiler room Any burnable material in floor surface or beneath? none If so, how protected? Kind of fuel? oil Minimum distance to burnable material, from top of appliance or casing top of furnace
From top of smoke pipe
If gas fired, how vented?
IF OIL BURNER
Name and type of burner American Std-guntyps Labelled by underwriters' laboratories? Yes Will operator be always in attendance? Does oil supply line feed from top or bottom of tank? bethera—top Type of floor beneath burner concrete. Size of vent pipe 1½. Location of oil storage outside underground Number and capacity of tanks 1000 gals. Low water shut off Make No. Will all tanks be more than five feet from any flame? Yes How many tanks enclosed? Total capacity of any existing storage tanks for furnace burners Sant to the thot P/1/20
Location of appliance
MISCELLANEOUS EQUIPMENT OR SPECIAL INFORMATION
Tank will be bur ed 3' underground and covered with asphaltum. Tank bears Und Label. Amount of fee enclosed? 10.00 (\$2.00 for one heater, etc., \$1.00 additional for each additional heater, etc., in same
building at same time.)
Will there be in charge of the above work a person competent to see that the State and City requirements pertaining thereto are observed? yes
or soul by: PI O. E. Charl II.

APPLICATION FOR PERMIT FOR HEATING, COOKING OR POWER EQUIPMENT

FEB 7 199 City Of Portiana

PERMIT ISSUE

Portland, Maine, Feb. 7, 1991

To the INSPECTOR OF BUILDINGS, PORTLAND, ME.
The undersigned hereby applies for a permit to install the following heating, cooking or power equipment in accordance with the Laws of Maine, the Building Code of the City of Portland, and the following specifications:
Location
Name and address of owner of appliance Allen Ave. Unitarian Universalist Church: same
Name and address of owner of appliance Allen Ave. Unitarian Universalist Church same Bidd. ME 04005 Installer's name and address C. & S. Plumbing & Heating, IncP.O. Box 1862, Teleplone
General Description of Work
To install Eqt.water.heating.system
IF HEATER, OR POWER BOILER
Location of appliance Basement Any burnable material in floor surface or beneath?
Minimum distance to burnable material, from top of appliance or casing top of furnaceatleast 3' all around
From top of smoke pipe
If gas fired, how vented? Rated maximum demand per hour
Will sufficient fresh air be supplied to the appliance to insure proper and safe combustion?yes
IF OIL BURNER
Name and type of burner Carlin Labelled by underwriters' laboratories? yes
Will operator be always in attendance? . no . Does oil supply line feed from top or bottom of tank? bottom .
Type of floor beneath burner concrete Size of vent pipe
Location of oil storageBasement
Low water shut offyes
Will all tanks be more than five feet from any flaine? Yes How many tanks enclosed? none
Total capacity of any existing storage tanks for furnace burners
IF COOKING APPLIANCE
Location of appliance Any burnable material in floor surface or beneath?
If so, how protected?
Skirting at bottom of appliance?
From front of appliance From sides and back From top of smokepipe
Size of chimney flue
Is hood to be provided?
If gas fired, how vented?
1. 11/2 FILL PIPE MISCELLANEOUS EQUIPMENT OR SPECIAL INFORMATION PIPE 3. Kad of heat
4. Burner rigidity & support
7. High limit control 8. Main cutoff switch
8: Main cutof: switch
3. Low water out off
Amount of fee enclosed \$2545.00 as 5000.00 12. Plping surport & protection
\$5,000.00 IZ. Valves in simply line
13. Gapacity of tanke
14. Tank ກ່ຽງໄດ້ກ່າງ & support PROVED: 15. Oil gauge
Will show he in shows a 18th of the Million Ages of competent to
Will there be in charge of the provided works person competent to
To: Applied Ventilities
