AP-Lot 27 Bartley Avenue

Oct. 22, 1962

Mr. Martin Bartley
75 Bartley Avenue

Dear Mr. Bartley:

Permit to construct a 1½ story frame dwelling with attached 2-car garage 57'8" x 56'8" is being issued subject to plans received with application and in accordance with our discussion as follows:

1. Foundation walls are to be 10" uniform thickness for the main house rather than the 8" thick walls shown on the plans.
2. The bulkhead to the cellar is to have at least 8" uniform thick concrete walls extending at least 4' below grade rather than the arrangement shown on the detail of Sheet 4.
3. It is understood that the first floor framing under the kitchen-dining room area is to be framed with not less than 2x10" Douglas members spaced at 16" on centers, on a span of 18', which can rely on the 6x10" Douglas Fir intermediate girder in the cellar which is adequate for framing as shown. If it is decided to use an intermediate girder at the location shown on the plan then the size and material need to be approved by this office before a form inspection.
4. Headers and trimmers at stairwell are to be doubled rather than as shown on the plans.
5. Header carrying second floor loads above right hand front porch will need to be built up of four 2x12" Douglas Fir members rather than the three 2x12" members shown.
6. Rafters on a horizontal span of 15 feet will need to be spaced at not over 16 inches on centers instead of 24 inches on centers.
7. The 2x8" rafters on a horizontal span of 18' will need to be spaced at 12" on centers, if of hemlock, or 16" on centers if of Douglas Fir.
8. As the first floor joists are to be 10 inches depth as was originally shown on the plans, it is desirable to increase the depth of the stair framing and to realize savings in weight if desired, then we will need to know the size of the framing to be used before the form inspection is to be held.

Very truly

Gerald E. ...
Deputy Building
