July 20, 1962

MISCELLANEOUS APPEAL

Margaret Gibson, owner of property at 267-271 Auburn Street
under the provisions of Section 24 of the Zoning Ordinance of the City of Portland, hereby
respectfully petitions the Board of Appeals to permit: Construction of a single family
dwelling, breezeway, and one car garage on the property at this location. This permit is
presently not issuable because the building is to set back from the line of Auburn St. only
25 feet instead of the minimum setback of 40 feet required by Sec. 21 of the Ordinance.

LEGAL BASIS OF APPEAL: Such permit may be granted only if the Board of Appeals finds that
enforcement of the terms of the Ordinance would result in undue hardship and desirable relief
may be granted without substantially departing from the intent and purpose of the Ordinance.

APPELLANT

DECISION

After public hearing held August 2, 1962 the Board of Appeals finds that enforcement
of the terms of the Ordinance would result in undue hardship and desirable relief may
be granted without substantially departing from the intent and purpose of the Ordinance.

It is, therefore, determined that such permit may be issued.

Dear Mr. Chase:

Building permit for construction of a single family dwelling, breezeway and one car garage at the above named location is being issued subject to compliance with Building Code regulations as follows:

1. Garage and breezeway sills which are not shown will need to be solid 4"x6" members unless box sills are to be used in breezeway.
2. The cross-section detail of the main house shows no vertical member which is necessary for a box sill construction. It is also called to your attention that where the floor joists run parallel to the sill then this member is to be doubled.
3. Girder will need to be either a 6"x10" Douglas Fir member as per plan or a 4"x12" Douglas Fir member not a 4"x12" spruce member as stated on your application.
4. The first floor joists will need to be spaced at not over 18" on centers with the use of one inch nominal size hemlock sub-flooring shown. This will also apply to the joists spacing of the breezeway.
5. Header supporting ceiling and roof loads above the 8 foot wide bow window opening will need to be a minimum size of 4"x10" hemlock member.
