NFO WMcD 4/1/57

March 19, 1957

BF 499-503 Auburn Street

Fr. Stanley Brown k.F.D. #1 Cumberland Center, fie.

Copy to Dr. Charles G. Kartin 501 Auburn Street

Mear Mr. Brown:

Upon personal inspection of the dwelling at 499-503 Auburn St., of Dr. Martin, for which the required certificate of occupancy was issued to you on August 13th, 1956, I was troubled by two particular items on which the Building Code has definite bearing—items which seem to be somewhat defective.

Boside the chimney there is a partitioned off space which runs from the underflooring of the first floor to the attic which is open to the attic, having been closed by the owner by stuffing something into it at the attic level. I did not have the plans with me but now that I have returned to the office no indication of it is found on the plan. That is not important; but the fact that the boards of the underfloor of the first story have sizeable cracks between them incould stand in the attic and look down through this small shaftway between the fledd inspector apparently being unaware of this situation, I feel sure that you will agree that you ought now to go back there and introduce a firestop by way of floor boards at this point to provide an adequate firestop to provent any fire

You evidently provided the firestop at first story calling level around the chiancy but the space between the attic floor framing in the chiancy should also be filled with mineral wool or the like. At the same time, if the owner agrees, it would be well to cover tightly at the attic level this small shaftway referred to soove.

It was puzzling to see that in many cases the mitred end of the rafters did not fit tight against the full depth of the ridgeboard. In each of these cases the top of the rafter was tight against the ridgeboard but the bettem of the mitre appears to be a quarter to a half an inch aray from the vertical surnay impression that rafters in such a case are all cut on the same engls and some of these rafters fit against the ridgeboard nicely.

Whether or not this condition was present at time of final inspection is not known, but how it could occur after that without distortion of exterior walls of the building is difficult to see, and no distortion of these walls was noted. You or scaecome have driven small we sees—they look like pieces of shingle-in these openings, which closes the gap and probably will care for the cituation if they are fustoned in place. If they are not fastened in place, it is likely that natural shrinkage will cause them later to fall out. It fixed to as that you

Mr. Stanley Brown - - - - 2

March 19, 1957

should make sure, with the consent of the cwner, that these wedges fit tightly in each case where needed and that they would be fastened in place so that they will always remain to make up for the deficient bearing of the rafters against the ridgeboard.

I am not trying to be unduly critical, Hr. Brown, but I feel sure that you will must to make these points as complete as it is possible now to do, and that you will take care to avoid similar difficulties in future work under the supervision of this department. Will you not do to before April 1st, and it will be appreciated if you will notify me when it is done.

If you should care to talk the matter over with me, will you call in advance and arrange to come in some afternoon?

Very truly yours,

Warren McDonald. Inspector of Buildings /

WHcD/G

CITY OF PORTLAND, MAINE

Department of Building Inspection

March 16, 1956

Location - Lot 1 Auburn Street (501) Owner - Stanley Brown Type Bldg. - Dwelling

To the Health Director:

Application for building permit identified as above has been filed in this office; indicating that a septic tank installation is proposed, as a means of sewage disposal. Applicant represents that connection to a public sewer is not feasible. Copy to owner and contractor is attached.

Your approval as to the method of sewage disposal is requested before a building permit is issued, therefore will you complete and return the appended report as expeditiously as possible.

Masses Madanald.
Inspector of Buildings H

Edwarder Tithe Health Director 3/20/14

Attachment: Copy of this notice

Proposed sewage disposal method is is approved.

Mr. Stunley Brown R.F.D. 11 Sumberland Center, Me.

Hr. Charles Marvin 499-503 Auburn St. Comer - Charles Martir

Job - New Dwolling

Gentlemen:-

Upon inspection of the above job on August 6, 1956, the following emission was found which prevents us from issuing the certificate of onsupancy—required by law to be in pessession of the owner before the building may be lawfully occupied:

Cleancut not usable in chimney because opening is not broken in the liming.

At is important that the above condition be corrected before August 14, 1956 and that you notify this office of readiness for another inspection, so that, if all is found in order, the certificate of occurrency required by law may be issued.

Very truly yours,

Earlo S. Smith

...../B

March 16, 1956

Mr. Stanley Brown, RFD #1, Cumberland Center, Maine

Dear Mr. Brown:

Application today by you to construct a dwelling at 501 Auburn Street (Lot 1) indicates that no connection is possible to a public sewer, and that sewage disposal is proposed by septic tank.

The Building Code directs, where connection to a public sewer is not possible, that the proposed method of sewage disposal must be approved by the Health Officer before any building permit is issued.

That the Health Department may be aware of the proposed method of sewage disposal, you should explain, by plan or otherwise, the details and location of the septic tank system, including nature of the soil where overflow lines will be located, to Sanitary Engineer Norman Winch.

Very truly yours,

Inspector of Buildings
