APPLICATION FOR PERMIT FOR HEATING, COOKING OR POWER EQUIPMENT

Portland, Maine, Feb 13, 1975

PERMIT ISSUED

0099 FEB 13 1975

CITY OF PORTLAND

To the INSPECTOR OF BUILDINGS, PORTLAND, ME.

The undersigned hereby applies for a permit to install the following heating, cooking or power equipment in accordance with the Laws of Maine, the Building Code of the City of Portland, and the following specifications:

Location 640 Auburn St. Use of Building dwelling No. Stories 1 New Building Existing
Name and address of owner of appliance Mrs. McDuffy, same
Installer's name and address Gray Oil, 396 Commercial St. Telephone

General Description of Work

To install replace a hot air furnace in existing system

IF HEATER, OR POWER BOILER

Location of appliance basement Any burnable material in floor surface or beneath? no
If so, how protected? Kind of fuel?
Minimum distance to burnable material, from top of appliance or casing top of furnace
From top of smoke pipe From front of appliance From sides or back of appliance
Size of chimney flue Other connections to same flue
If gas fired, how vented? Rated maximum demand per hour
Will sufficient fresh air be supplied to the appliance to insure proper and safe combustion?

IF OIL BURNER

Name and type of burner thermacore Labelled by underwriters' laboratories? yes
Will operator be always in attendance? Does oil supply line feed from top or bottom of tank? bottom
Type of floor beneath burner conc Size of vent pipe 1 1/2
Location of oil storage basement Number and capacity of tanks 1-275
Low water shut off Make No.
Will all tanks be more than five feet from any flame? How many tanks enclosed? none
Total capacity of any existing storage tanks for furnace burners

IF COOKING APPLIANCE

Location of appliance Any burnable material in floor surface or beneath?
If so, how protected? Height of Legs, if any
Skirting at bottom of appliance? Distance to combustible material from top of appliance?
From front of appliance From sides and back From top of smoke pipe
Size of chimney flue Other connections to same flue
Is hood to be provided? If so, how vented? Forced or gravity?
If gas fired, how vented? Rated maximum demand per hour

MISCELLANEOUS EQUIPMENT OR SPECIAL INFORMATION

Amount of fee enclosed? 5.00

APPROVED: OK-2-13-75-NPC

Will there be in charge of the above work a person competent to see that the State and City requirements pertaining thereto are observed? YES

Hubert A. Thurston
630 Auburn Street

Harry Getchell,
Gorham, Maine

Dear Mr. Thurston:

In making a cursory inspection of your newly enclosed breezeway between your dwelling and garage it might be well to point out to you that fireproofing as well as being required on the garage side of wall separating the uses it is also necessary that fireproofing be provided on the underside of the rafters where breezeway roof "makes" onto garage roof.

Of course also an 1-3/4" solid wood fire door is required in the door opening between garage and breezeway.

Very truly yours,

Earle Smith
Field Inspector

Gentlemen:

Upon inspection of the above job on May 26, 1966, the following defect was found:

Fuel oil supply line lays on floor unprotected from burner unit to where it intersects line from oil tank.

It is important that correction of these conditions be made before June 6, 1966, and notification be given this office of readiness for another inspection.

If additional information relative to the above is desired, please phone Inspector Earle Smith at 774-8221, extension 236, any weekday but Saturday between 8:00 and 9:00 A. M.

Very truly yours,

Earle S. Smith

September 12, 1952

Mr. John E. Forsyth,
630 Auburn Street,
Portland, Maine

Dear Mr. Forsyth:

Building permit for construction of a single car wood frame garage 14'x22' on the lot with your dwelling at 630 Auburn Street is issued herewith subject to the following conditions:

1. Posts used for support of the building are required to extend at least four feet below grade and to be of cedar or some other durable species of wood. The use of posts of hemlock or spruce ordinary sawn lumber is not acceptable.
2. Spacing of posts supporting the building is not indicated. On the basis that the 4x6 sills are to be of full size lumber set with the 6" dimension upright, no less than two intermediate posts, besides those at the corners, will be needed on the sides of the building where the roof load is to be carried. This will mean a spacing of about seven feet on centers.

Very truly yours,

WMcD/H

Inspector of Buildings

INSPECTION COPY

AP 638 Auburn Street-I

January 30, 1951

Pallotta Oil Company
112 Exchange Street
Portland, Maine

Copy to: Mr. John Forsyth
638 Auburn Street

Gentlemen:

Enclosed is the belated building permit for installation of forced warm air heating system and oil burning equipment for Mr. John Forsyth in his new home at 638 Auburn Street, the installation having been completed before securing the building permit.

Upon checking over the job on January 12, the permit still not having been issued, our inspector reported that the only omission was that no instruction card relating to the operation of the oil burner had been posted close to the burner assembly. Our inspector left word at the Pallotta Oil Company office that an instruction card was to be furnished, but on January 17 there was still no card in evidence.

We shall pursue the matter no farther, but furnishing of an instruction card is just as much a requirement of law as any other, and it is to be hoped that the owner will insist upon having this instruction card posted near the burner for his own satisfaction and the safety of his home.

Very truly yours,

Warren McDonald
Inspector of Buildings

WARNING !!!

THIS BUILDING PERMIT IS ISSUED
SUBJECT TO SEPCIAL CONDITION:

THAT NO CONCRETE SHALL BE Poured IN FOUNDATION FORMS AND NO
LAYING OF UNIT MASONRY IN FOUNDATION WALLS SHALL BE STARTED UNTIL
NOTICE HAS BEEN GIVEN AT THE DEPARTMENT OF BUILDING INSPECTION OF
READINESS TO START ACTUAL MASONRY WORK, AND UNTIL RE-CHECK OF
LOCATION HAS BEEN MADE BY INSPECTOR.

* * *

Original markings of corners of lot and especially stakes on
street line set by Dept. of Public Works must be kept intact and
easily accessible for re-check-- not covered by excavated earth
or building materials. Otherwise the "go-ahead" cannot be given.
Dept. of Public Works cannot re-set their stakes.

Obviously the notice for re-check must be given at such a time
as to allow reasonable opportunity to make re-check.

Job - Minor Garage

Dear Mr. Brown:

Upon inspection of the above job on September 19, 1955, the following emissions or defects were found:

The fire protection necessary between garage wall and breezeway and between garage and breezeway roof has not been provided.

It is important that correction of these conditions be made before October 10, 1955, and notify this office of readiness for another inspection.

If additional information relative to the above is desired, please phone Inspector Smith at 4-1431, extension 234, any week day but Saturday between 8:00 and 6:30 A. M.

Very truly yours,

Eric S. Smith
Field Inspector

AP - 640 Auburn Street

Contractor - ^o Joseph L. Morin
193 Lambert St.

Owner - ^c Frederick Brown
640 Auburn St.

Permit for construction of two car garage attached to dwelling at 640 Auburn St. is issued herewith subject to the conditions listed below because we are not certain what construction you intend to provide. If you are unwilling or unable to provide the construction indicated or if you do not understand what is meant or wish to follow some other method of construction, no work is to be started and the permit is to be returned to this office for adjustment. Conditions under which the permit is issued are as follows:-

- it is our understanding that the concrete foundation wall is to be provided around the entire perimeter of the addition including the enclosed portion between dwelling and garage space.
- the partition between the garage space and rest of addition is to extend to the underside of the roof boarding and is to be covered on the garage side with sheets of asbestos cement at least $3/8$ of an inch in thickness with the joints between sheets filled with cement mortar. Two layers of $3/16$ inch thick material may be used if the $3/8$ inch material cannot be secured. Proper support will of course need to be provided for this partition.
- the door and frame to be provided in the opening in this partition is required to be covered completely with metal, with joints in the metal lapped and locked, unless a solid core wood door at least $1\ 3/4$ inches thick is used.
- this door is required to be equipped with a self-closing device which will keep it shut except when someone is passing through the opening.
- unless the wood floor of the connection to dwelling is to be at least six inches higher than the floor of garage, a six inch raised threshold is required in the doorway in the partition on which the protection is to be provided.
