CS. 103

60-68 Caron Street

May 14, 1971

Frank Cavallaro
15 Berkshire Road

Dear Mr. Cavallaro:

Permit to construct a 1½-story frame dwelling with 2-car garage in the basement is issued herewith subject to the following Building Code requirements:

1. Typical sections show foundation 3' below grade. The Building Code requires that foundations extend at least 4' below grade and 6" above grade.

2. Wooden framed walls veneered with brick; the veneer should be tied to the frame by metal wall ties spaced not more than 16" from center to center of every fifth course of brick, or the equivalent of such spacing in the event that material other than brick shall be used. Ties shall be crimped or corrugated copper no less than 3/4" wide, long enough to allow two nails for fastening to the frame wall, and of such thickness that at a width no greater than 7/8", 1,000 ties will weigh at least 48 lbs., or the same size, shape and weight of sheet metal, galvanized after fabricating, if two ties are nested (one on top of the other) at each point, or any other size, shape, weight and material equivalent in strength and permanency.

Very truly yours,

Earle S. Smith
Plan Examiner

DEPARTMENT OF BUILDING INSPECTION

NOTICE RELATING TO SEWAGE DISPOSAL

x means copy sent to the parties
Date May 12, 1971
Location Lot 23 pt. lot 24 Caron St Description Single family dwelling with 2-car garage
Owner and Address Frank Cavallaro, 15 Berkshire Road in basement
Contractor and Address owner
Actual Area of Lot _____ Sq. Ft. Zone R-1 Residence
Area required by Zoning Ord. if sewer were available _____

Where septic tank systems are required for sewage disposal, the Zoning Ordinance provides that the least allowable area of the lot shall be determined by the rate of percolation of the soil, this being the capacity of the soil to allow liquids to pass through as determined by tests. The Building Code directs that, where a septic tank is to be used, a building permit shall not be issued unless the proposed method of sewage disposal has been approved by the Director of Health.

Since application for the above permit indicates that connection to a sewer is not possible, it is necessary for the owner or his agent to file a site plan with the Health Department, to explain the method of sewage disposal proposed, and to make arrangements for a percolation test to be made under supervision of that department.

After the rate of percolation has been determined, the Director of Health will notify this department of the area of lot required on the basis of the results of the test. If the lot area required by the tests is equal to or less than the actual area of the lot and not less than the minimum lot area required in the zone in which the property is located for cases where connection to a sewer is available, the building permit can be issued; otherwise the permit cannot be issued unless authorization is secured from the Board of Appeals.

Director of Building & Inspections

2 copies to Health Director

(This space for Health Department use)

Inspector of Buildings

Rate of Percolation is 16 minutes. On this basis area required by Zoning Ordinance is 12000 sq. feet.
