Inspector

Albert J. Sears

Inspector of Buildings

Notice: This certificate identifies lawful use of building or premises, and ought to be transferred from owner to owner when property changes hands. Copy will be furnished to owner or lessee for one dollar.

Lot 6 Crestview Drive

June 6, 1961

L. E. Marston
68 Brook Road
Palmouth, Maine

Dear Mr. Marston:

Upon inspection of the above job on June 6, 1961, the following defects were found which prevent us from issuing the certificate of occupancy--required by law to be in possession of the owner before the building may be lawfully occupied:

1. No self-closer on fire door between garage and balance of house.
2. Flue lining not broken through in cleanout opening.
3. Certain columns not fastened.
4. Chimney does not extend at least two feet above highest point where it cuts roof, in this case "the ridge".

It is important that the above conditions be corrected before June 22, 1961 and that you notify this office of readiness for another inspection, so that, if all is found in order, the certificate of occupancy required by law may be issued.

If additional information relative to the above is desired, please phone Inspector Earle Smith at 4-8221, extension 234, any week day but Saturday between 8:00 and 9:00 A.M.

Very truly yours,

ESS/jg

NOTICE RELATING TO SEWAGE DISPOSAL

x means copy sent to the parties

(date) September 22, 1959

Location Lot 6 Crest View Drive Description Dwelling & attached garage

Owner and Address Earl M Christensen, 357 Summit St.

Contractor and Address owner

Architect or Engineer and Address _____

Actual Area of Lot 15,000 Sq. Ft. Zone _____

Area required by Zoning Ord. if sewer were available 10,000

Where septic tank systems are required for sewage disposal, the Zoning Ordinance provides that the least allowable area of the lot shall be determined by the rate of percolation of the soil, this being the capacity of the soil to allow liquids to pass through as determined by tests. The Building Code directs that, where a septic tank is to be used, a building permit shall not be issued unless the proposed method of sewage disposal has been approved by the Director of Health.

Since application for the above permit indicates that connection to a sewer is not possible, it is necessary for the owner or his agent to file a site plan with the Health Department, to explain the method of sewage disposal proposed, and to make arrangements for a percolation test to be made under supervision of that department.

After the rate of percolation has been determined, the Director of Health will notify this department of the area of lot required on the basis of the results of the test. If the lot area required by the tests is equal to or less than the actual area of the lot and not less than the minimum lot area required in the zone in which the property is located for cases where connection to a sewer is available, the building permit can be issued; otherwise the permit cannot be issued unless authorization is secured from the Board of Appeals.

Albert J. Sears
Inspector of Buildings

2 copies to Health Director

(This space for Health Department use)

Inspector of Buildings

Rate of Percolation is 5 minutes. On this basis area required by Zoning

Ordinance is 9100 sq. ft.

Re: Lot #6 Crest View Drive
Portland, Maine

Dear Mr. Sears:

The following revisions have been made to comply with your letter of September 25th:

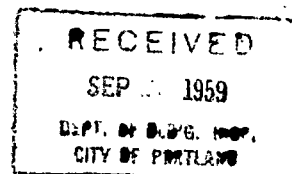

1. The following beams have been inserted; 4x10's over garage door openings; 4x8 over breezeway supporting roof; 4x10's over large windows front and rear of building. - O.K.
2. 6x10 girders now replace 6x8 shown previously. - O.K.
3. A 10" foundation wall without footing will be used in place of 8" wall on footing. - O.K.
4. The three 2x8's indicated previously to support rear walls and roof across study has been changed to three 2x12 fir and one 2x8 fir, to be bolted with $\frac{1}{2}$ " machine bolts staggered at 18" on center.
5. Beneath the partition separating the master bedroom from the rear bedroom second floor, 4, 2x8 floor timbers will now be used, as well as double timbers beneath partitions between closets in the other two bedrooms. - O.K.

Very truly yours,

L. C. ANDREW

APPLICATION FOR PERMIT FOR HEATING, COOKING OR POWER EQUIPMENT

Portland, Maine, March 28, 1960

PERMIT ISSUED
MAR 28 1960
CITY OF PORTLAND

To the INSPECTOR OF BUILDINGS, PORTLAND, ME.

The undersigned hereby applies for a permit to install the following heating, cooking or power equipment in accordance with the Laws of Maine, the Building Code of the City of Portland, and the following specifications:

Location Lot 6 Crestview Drive Use of Building Dwelling No. Stories 2 New Building
Name and address of owner of appliance Earl M. Christensen, 357 Summit St. Existing
Installer's name and address Ballard Oil & Equipment Co. 135 Marginalway Telephone 2-1991

General Description of Work

To install Oil-fired forced hot water heating system

IF HEATER, OR POWER BOILER

Location of appliance Basement Any burnable material in floor surface or beneath? none
If so, how protected? Kind of fuel? oil
Minimum distance to burnable material, from top of appliance or casing top of furnace 3'
From top of smoke pipe 2' From front of appliance 6' From sides or back of appliance 6'
Size of chimney flue 8x12 Other connections to same flue none
If gas fired, how vented? Rated maximum demand per hour
Will sufficient fresh air be supplied to the appliance to insure proper and safe combustion? yes

IF OIL BURNER

Name and type of burner Waltham Labelled by underwriters' laboratories? yes
Will operator be always in attendance? Does oil supply line feed from top or bottom of tank? bottom
Type of floor beneath burner concrete Size of vent pipe 1 1/2"
Location of oil storage basement Number and capacity of tanks 275 Gal.
Low water shut off Make No.
Will all tanks be more than five feet from any flame? yes How many tanks enclosed?
Total capacity of any existing storage tanks for furnace burners

IF COOKING APPLIANCE

Location of appliance Any burnable material in floor surface or beneath?
If so, how protected? Height of Legs, if any
Skirting at bottom of appliance? Distance to combustible material from top of appliance?
From front of appliance From sides and back From top of smokepipe
Size of chimney flue Other connections to same flue
Is hood to be provided? If so, how vented? Forced or gravity?
If gas fired, how vented? Rated maximum demand per hour

MISCELLANEOUS EQUIPMENT OR SPECIAL INFORMATION

Amount of fee enclosed? 2.00 (\$2.00 for one heater, etc., 50 cents additional for each additional heater, etc., in same building at same time.)

APPROVED:

O.K. E.S.S. 3/28/60

Will there be in charge of the above work a person competent to see that the State and City requirements pertaining thereto are observed? yes

Sept. 25, 1959

Mr. Earl M. Christensen
357 Summit Street

cc to: L. C. Andrew
Att: Asa J. Baxter
167 Brighton Avenue

Dear Mr. Christensen:

Building permit for construction of a single family dwelling with breezeway and attached garage is issued herewith based on plans filed with application for permit, but subject to the following conditions:

1. Before notification is given for check of forms and location prior to pouring concrete for foundation walls, information as to the size ~~needed to be provided over~~ large garage door openings, support of breezeway rafters, and over ~~large~~ window openings in front and rear walls of main building to be furnished for checking and approval.
2. The 6x8 girder on spans indicated will need to be of full size spruce or hemlock or dressed Douglas Fir in order to figure out. - ~~will do~~ 6x10
3. Foundation walls are to be 10 inches thick without a footing instead of the construction shown on plans. - ~~0.12~~
4. The girder of 3-2x8's indicated for support of rear wall and roof across study has a carrying capacity of only about one-third of the theoretical load involved. However, if window in second story bedroom directly over this girder were to be centered and the wall trussed each side of the opening, such construction should be adequate. If other construction than this is desired, approval should be secured before framing is started.
5. Unless second story ceiling timbers are to be hung to the roof framing at the ridge, at least 4-2x8's will be needed in second floor framing beneath partition adjoining master bedroom as well as doubled timbers beneath each partition forming closets between other bedrooms. - ~~will do~~

Very truly yours,

Albert J. Sears
