CS 147

Location:Lot 4 Crestview Drive

Nov. 17, 1964

Hr. Frank Fierobello 769 Washington Avenue

Dear Mr. Pierobello:

Upon inspection of the above job on Nov. 16, 1964, the following omissions were found which prevent us from issuing the certificate of occupancy—required by law to be in possession of the owner before the huilding may be lawfully occupied:

- Ho self-closing device on door between garage and balance of dwelling.
- 2. Note in flooring beneath tur not closed off with incombustible material.
- 3. Lally columns not fastened.

It is important that the above conditions be corrected before Nov. 27, 1966, and that you notify this office of readiness for another inspection, so that, if all is found in order, the certificate of occupancy required by law may be issued.

If additional information relative to the above is desired, please phone Inspector Earle Smith at 774-8221, extension 236, any week day but Saturday between 8:00 and 8:30 A. M.

Very truly yours,

Earle Smith Field Inspector

ES:m

Lot 4 Crestview Prive

Sept. 4, 1964

hr. Frank Pierobellio Lot 4 Crestview Prave

Dear Mr. Merobello:

You may consider this letter as a temporary certificate of occupancy.

When the following items have been cared for and this office notified for another inspection, and, if at that time, all is found in order the regular certificate of occurancy required by law will be issued.

- Close off nole in flor ing b-meath tub with incommustible material.
- 2. Fasten -elly columns.
- Frovide self-closing device on fire down etween garage and balance of nouse.
- 4. Fireproof between rafter ends where they rest on garage wall between house and garage.

If additional information relative to the acove is desired, please notify inspector harle smith at 774-8221, extension 236, any week day but saturday between 8.00 and 8:30 . H.

Very truly jours,

iarle o. with Field Inspector

Memorandum from Department of Building Inspection, Portland, Maine

BP - Lot 4 Crestview brive

October 8, 1963

Mr. Frank Pierobello, 769 Washington Ave.

Dear Mr. Pierobello:

At an inspect. It of your dwelling under construction at the above location we find that some of your cantilevered purlins supporting the roof overhang havebeen notched so as to make them structurally unsound. It is necessary that you contact this office before proceeding any further so that a method of correcting this condition can be approved while you are in the framing stage.

Very truly yours,

Gerald & Mayberry Deputy Director of Building Inspection

Œ4/h

CS-27

pl-AP Lot & Grostview Grive June 27, 1963 Er. Frank T. (ierobello 769 Washin ton venue Dear Mr. Mierobello. Fermit to construct a 1-story frame dwelling with attached 2-car frame garage 57' wide by 42 feet long is being issued subject to the conditions of our letter of June 26, 1963 and sulliting to be requirements being met satisfactorily as per our discussion as follows: 1. All exterior wall sections are to have 2x4 inch stude set at not less than 16 inches on centers, covered with 1 inch nominal thickness wood sheathing or approved equal, and to be further covered with weather hearding or weather resistent plywood siding. 2. Window openings under eaves are not to exceed 6 feet between the supporting members and are to have solid LXE inch hemlock headers to support the roof and cei ing loads above. 3. The girder carrying the load bearing partition between the living room and kitchen is to be supported at the front of the house on the foundation beside the fireplace. There is to be a solid 4x12 inch purlin member to support the roof and ceiling loads directly above the 6x10 inch girder in the basement. finis purlin is to be supported near the fireplace by a 4x6 inch column on the exterior wall and a 4x6 inch column within the bearing partition directly above a steel polumn in the basement. There is to be a 1 inch clearance between the combustible wood members and the chimney construction.

Emilian P

5. Girder is to be a solid 6x10 inch Douglas Fir member or other steered being grade marked at not less than 1500 pounds per square inch fiber stress and set directly under the bearing partition located between the living room and kitchen.

4. Hoof is to be covered with a built-up tar and gravel roof.

6. Header over closet in bedroom #2 is to be a solid 4x2 inch Douglas Fir or a half inch hemlock member to support roof and ceiling loads above.

Very truly yours,

Gerald E. Mayterry
Deputy Building Inspection Director

G. Ham

AP - Lot 4 Crestview Urice

June 26, 1963

Mr. Frank T. Pierobollo 769 Washington ive.

war hr. Microbello:

More information is needed to show that the or entery frame dwelling proposed at the above location meets Building Code exquirements before a permit can be issued as follows:

- 1. There is a question as to enother the panels above and below window areas are adequate to serve as exterior enclosing walls.

 There are no details of the construction of these panels.
- 2. There are no headers or lintels shown which are necessary to carry the roof loads over the wids which openings in the exterior walls.
- uite tols. 3. As it is not allowable to support any part of the structure from the chimney we will need to know how the girder and roof purlim is supported at the front of the huilding. Plans show these normans supported at the chimney construction.
- 4. The type and weight of roofing will need to be given.

 Very truly yours,

 Tava

NOTES

ارز

Ar-lot 4 Crest View Drive

June 19, 1963

Mr. Frank T. Pierobello 769 Washington Avenue

Dear hr. Pierobello:

Approval for the use of a septic tank sewage disposal system for proposed dwelling on the lot at the above named location just having been received from the Health Department, advance permit for excavation and construction of foundation only for a single family dwelling and attached garage is issued herewith:

- 1. In approving septic tank sewage disposal system, the Health Department has specified that a 1000 gallon tank and a 3 foot by 3 foot by 150 foot absorption trench shall be used. That department should be consulted concerning these requirements.
- 2. There seems to be confliction as regards foundation walls between information indicated in permit application and that shown on supplementary sheet of plans. The 12 inch concrete block wall with 8 inch by 16 inch poured concrete footing is acceptable. However, if poured concrete is to be used for entire wall, it is required to have a minimum thickness of 10 inches, but, where brick veneer is to be used, a minimum thickness of 11 inches is required. In any case walls are required to extend not less than 4 feet below grade at all points.
- 3. Where box sill construction is used, anchor bolts are required to be located at corners and at intervals of not over 6 feet (instead of 8 feet shown) between corners. These should be installed when wall is constructed.
- 4. Sill of garage is required to be a solid 4x6 bolted in same manner as box sill.
- 5. No work above foundation is covered by this permit and is not to be started until general construction permit has been issued.

Very truly yours,

Albert J. Sears Building Inspection Director

ARSTOGRIVE AROXII

The top of the line from the company that is already accepted as the maker of the finest swimming pools available today. Elegant appearance, massive construction and maintenance free service in an EXTRUDED ALUMINUM POOL that satisfies even the most discriminating buyer. It pays to buy the best from the best.

NOTE THESE QUALITY FEATURES:

- Massive 7" painted wnite extruded aluminum top rail ribbed for added beauty, safety and strength. Has oversized 3" rear lip with more metal than average 9" wide rail.
- Heavy-duty gracefully contoured 6" white extruded aluminum upright enhanced with colorful plastic feature strip.
- Oversized PAINTED aluminum patio base acts as a patio block for stability and sta-level feature.
- Aluminum, bottom rail and patio base are PAINTED with a double coat of chemical resistant paint to further protect this metal against the acidity and alkalinity of soil and pool water
- Aluminum wall is available in either blue, brown or green decorative woodgrain. Wall is coated with a FULL COA of paint on inside of wall to protect against corrosion.
- SHARKLINE uses only thu finest pool line material available, winterized VIRGIN vinyl liner as used in below ground liner pools. 20 garage lines
- Giant 2 piece vinyl coated aluminum top bracket designed to fit all sizes. On ROXBURY OVAL extra neavy steel struts and steel square marghts give maximum strength on the straight sides of the post with the protected with baked enamel over G-90 steel.

 Fytra upricites for maximum strength.
- Easiest to assemble . . . always a perfect lit. 101 9 1986
