March 13, 1956

AP - 728 Allen Avenue

Mr. Emmons Johnson
728 Allen Avenue

Dear Mr. Johnson:-

Information furnished in application for permit for construction of enclosed porch and attached garage on right hand side of dwelling at the above location is insufficient to show compliance with Building Code requirements. As far as we have been able to determine, the roof is to have a long and short pitch with the horizontal span of the front rafters being about 8 feet and that of those on the rear about 14 feet. Under such circumstances the 2x6 rafters will not figure out on the long span unless spaced no more than 12 inches on centers. If desired, 2x8's spaced not over 20 inches on centers may be used.

We shall be unable to issue a permit for construction of the addition until information as to how you will care for this problem has been furnished.

Very truly yours,

Albert J. Sears
Deputy Inspector of Buildings

Gentlemen:

Building permit for excavation and construction of foundation for enclosed passageway and two car garage to be attached to right hand side of dwelling at the above location is issued herewith, subject to the following conditions:

1. Care will need to be taken to install bolts in top of foundation wall for anchorage of sills when concrete is poured.

2. Another permit will be needed to cover the construction of enclosed passageway and garage, and no work is to be done above the foundation until this permit has been issued. With application for permit will need to be furnished full information as to framing, protection on wall between passageway and garage, etc.

Very truly yours,

Warren McDonald

57 Ray St.

Copy to: Mr. Edward J. Morris
14 June St.

Gentlemen:-

In attempting to check the staking out of the location of five new dwellings at 718-750 Allen Ave., an inspector from this department reports that he was unable to determine if the locations as staked on the lots at 718-724, 726-732, and 748-750 Allen Ave. comply with Zoning Ordinance requirements because the side lines of those lots which do not run at right angles to the street line have not been adequately marked for him to find their location on the ground. Please have stakes provided, if not at the rear corners at least part way along the length of those lot lines, so that the locations of the proposed buildings in relation to them can be determined, and notify this department when this has been done.

It is also necessary that the location of the dwelling on the lot at 718-724 be moved farther back from the street line than it has been staked. Since the front wall of the existing house on the adjoining lot is located 25 feet 6 inches back from Allen Ave., it is necessary that the front wall of the 15 inch overhanging projection on the front of the proposed dwelling be located no closer than this to the street line. This will mean that the front foundation wall will need to be located no less than 26 feet 9 inches from Allen Ave. Please have the location re-staked accordingly.

Very truly yours,

Warren McDonald
Inspector of Buildings
