December 28, 1967

Ernest R. Goodwin, R. S., Chief Plumbing Inspector
Health Hazards at 567 and 571 Allen Avenue

On December 16th letters were sent to the owners of the above named properties about their contamination of the brook by the discharge of the septic tank overflow.

They have taken corrective action on this matter as noted by inspection with Mr. Mathieu and myself of said property on December 28th. You can close the file on cases as no health hazard exists at this date.

Ernest R. Goodwin, R. S.

December 18, 1967

Mrs. Lila Innes
567 Allen Avenue
Portland, Maine

Dear Mrs. Innes:

On December 13th we dye tested your sewerage disposal system and at the extreme rear of your property, we found a positive fluorescent green tracing that we installed through flushing same from your first floor toilet bowl. At this point there is open tile that was discharging sewerage into a brook in a heavily vegetated area. We took a sample of this discharge and had same taken to the Health Department Lab for analysis. The results of this analysis gave us positive proof of the contamination of this area; the plate reading was 1,600,000 bacteria count per 100 ML. This is creating a definite health hazard and must be corrected at once. We will again inspect this property December 26th, 1967 for compliance before legal action is taken by this department.

If you care to call this office any morning between 8:00 and 9:00 A.M., telephone, 774-8221, Extension 234, I will be very happy to discuss this matter with you as to the least expensive way to correct same.

Very truly yours,

Ernold R. Goodwin, R. S.
Chief Plumbing Inspector
