CITY OF PORTLAND, MAINE  
BUILDING & INSPECTION SERVICES

Date June 26, 1981

To: Richard Libby  
(contractor)

495 Allen Avenue

With relation to permit applied for to demolish a 14' x 21' attached  
at (address) 515 Allen Avenue belonging to garage.

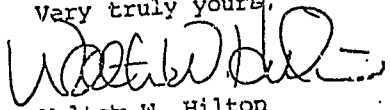

(owner) Norma Sands. It is unlawful to  
commence demolition work until a permit has been issued from this  
department.

Section 6 of the Ordinance for rodent and vermin control provides:  
"It shall be unlawful to demolish a building or structure unless  
provision is made for rodent and vermin eradication. No permit  
for the demolition of a building or structure shall be issued by  
the Building and Inspection Services Department until and unless  
provisions for rodent and vermin eradication have been carried out  
under supervision of a pest control operator registered with the  
Health Department."

The building permit for demolition cannot be issued until the  
provisions of this section have been satisfied. It is the obli-  
gation of owner or demolition contractor or both to take up with  
the Health Department the matter of complying with this section,  
being prepared to inform that department what registered pest  
control operator is to be employed.

NOTICE - PER MUNICIPAL CODE  
A PERMIT TO DEMOLISH OR REMOVE A  
STRUCTURE SHALL EXPIRE THIRTY  
(30) DAYS AFTER THE DATE OF  
ISSUANCE.

Very truly yours,

  
Walter W. Hilton  
chief Building Inspector

Health Department comments: No vermin noted.

Mr. Alphonse Thomas Roy  
517 Allen Avenue

cc to: Robert Penny,  
Pope Road, Windham

Dear Mr. Roy:

Permit to demolish existing 4'x9' side platform and steps and to construct 12'x14' side addition at this location is being issued subject to plans received with application and in compliance with Building Code restrictions as follows:

1. Bridging shall be installed at mid-span of all the tiers of floor joists and roof joists.
2. Plain concrete piers for foundations shall have a minimum least cross-sectional diameters for rectangular piers of 8 inches and for cylindrical piers of 9 inches. Sills supported on the masonry piers shall be securely anchored thereto.
3. Sills on the rear of addition which supports the roof and floor are to have a span of not more than six feet.

Very truly yours,

A. Allan Soule  
Inspector

Mr. H. S. Stultz  
R. F. D. #5  
Portland, Maine

Subject: Permit for construction of dwelling and  
attached garage at 515-521 Allen Avenue

Dear Sir:

In accordance with information furnished by you over the telephone, the permit for the above work is issued herewith subject to the following:

1. It is understood that the concrete floor of the garage is to be poured inside the foundation wall and independent of it and that sills of the garage will be no less than 4x6, all one piece in cross section, bolted to the foundation wall.
2. The studs in walls of garage are to be no less than 2x4, spaced not over 24" on centers.
3. The clear span of any single opening in the side wall of garage is to be not over four feet. A 4x6 or double 2x6 header is to be provided over any such opening.
4. A foundation extending at least four feet below grade is to be provided for end of trellis.
5. Roof covering of garage will be Class "C" labelled roofing.
6. Studs of all partitions are to be framed with 2x3 studs spaced not over 16" on centers.

Very truly yours,

Warren McDonald  
Inspector of Buildings

Mr. H. S. Stults  
R. F. D. #5  
Portland, Maine

Subject: Application for permit for dwelling and  
attached garage at 515-521 Allen Avenue

Dear Sir:

Due to lack of information on the plans filed with the application for the above work, several questions arise as to just what is intended and whether Building Code requirements will be met. In order to avoid any misunderstanding in regard to these matters, it is necessary that the following information be furnished before issuance of permit:

1. Is the opening to be left in the side wall of the garage as shown so that the floor slab will be exposed to the weather at all times? If so, the concrete slab should be poured inside the concrete block foundation wall and independent of it, instead of resting on top of wall as shown in section on plan. In such a case the sill is required to be 4x6 instead of the 4x4 shown. - *Slab poured inside*
2. What is size and spacing to be of the studs for support of the vertical sheathing on walls of garage? - *2x4 - 24"*
3. Is end of trellis to be supported on concrete slab outside of front door? If so, provision for a foundation extending at least 4' below grade is required. - *4' below grade*
4. Is the roofing indicated for roof of garage Class "C" labelled roofing or better? - *Class C*
5. If opening is to be provided in side wall of garage, what size header for support of ends of rafters of flat roof is to be provided?
6. The floor plan appears to indicate that perhaps some of the partitions are to be less in thickness than those constructed with 2x3 studs as is customary for non-bearing partitions. If so, what is to be used? - *All 2x3 studs*

Very truly yours,

Warren McDonald  
Inspector of Buildings
