INSPECTED BY Lilley (OVER)

CITY OF PORTLAND, MAINE
DEPARTMENT OF BUILDING INSPECTION

James Barton
419 Allen Ave.
Portland Maine

April 5, 1961

Dear Sir:

With relation to permit applied for to demolish a building or portion of building at 419 Allen Ave. it is unlawful to commence demolition work until a permit has been issued from this department.

Section 6 of the ordinance for rodent and vermin control provides: "It shall be unlawful to demolish any building or structure unless provision is made for rodent and vermin eradication. No permit for the demolition of a building or structure shall be issued by the Building Inspector until and unless provisions for rodent and vermin eradication have been carried out under supervision of a pest control operator registered with the Health Department.

The building permit for demolition cannot be issued until the provisions of this section have been satisfied. It is the obligation of owner or demolition contractor or both to take up with the Health Department the matter of complying with this section, being prepared to inform that department what registered pest control operator is to be employed.

Very truly yours,

Albert J. Sears
Albert J. Sears
Inspector of Buildings

April 22, 1927.

J. S. Nevins
419 Allen Avenue
Portland, Maine.

Dear Sir:-

Referring to your application for a building permit to build an addition to your dwelling house at 419 Allen Avenue, the information given on the application is so inconsistent that I fear you do not understand the Building Code or even the rudiments of construction of even this small addition. For instance the application states that the building is to be but one story high, but twenty-six feet from the ground to the highest point of the roof. The concrete foundation is stated to be nine inches thick at the top and twelve inches at the bottom, while ten inches at the top is the minimum thickness permitted by the Building Code. In addition you state that the underpinning is to ~~be of a thickness of seven feet and a~~ thickness of twelve inches. According to your description you would have an underpinning twelve inches thick setting upon a concrete foundation wall but nine inches thick. In other words there would be a projection of three inches from the underpinning beyond the foundation. You have given the information that the girder in the cellar would be supported by brick piers 8x12 inches. Any pier less than twelve inches by twelve inches will not be acceptable.

It would be well for you to have someone reasonably acquainted with building construction come to this office and make out a new application which will give consistent and lawful information. In the meantime the permit will be held in this office and it is unlawful for you to proceed with any of the work until the permit card is actually in your possession.

Yours truly,

8552

~~Financial completed~~
~~Row 1/10/20~~
~~proposed by [unclear]~~

Dec 27/82 Progressing slowly.

Jan 4/83
 Introduction program:

Jan 21/83

Went over the construction of the entire addition. Some additional bracing of the knee walls will be necessary & making ledgers under the ends of the roof joists on both knee walls. There is not much pitch to the roof & it could conceivably accumulate a large deposit of snow that would really load the roof. Owner is leaving the original exterior wall of the house that will be carrying the entire roof load. He was told to notify this dept immediately if he made any structural changes in the wall now or in the future.

4/1/83 Talked with owner, all work stopped through the winter, he expects to get on with it in the near future.

9/19/83 - 10/28/83 Slowly progressing as funds become available.

2/17/84 Slowly progressing.

BUILDING PERMIT REPORT

Address 2123 ALLEN AVE. Date 28/July/94
Reason for Permit To construct an 8'x12' deck
Bldg. Owner: David Marley
Contractor: owner
Permit Applicant: ' '
Approval: _____

CONDITION OF APPROVAL:

1. Before concrete for foundation is placed, approvals from ~~Public Works and~~ Inspection Services must be obtained. (A 24 hour notice is required prior to inspection).
2. Precaution must be taken to protect concrete from freezing.
3. It is strongly recommended that a register land surveyor check all foundation forms before concrete is placed. This is done to verify that the proper setbacks are maintained.
4. All vertical openings shall be enclosed with construction having a fire rating of at least one (1) hr., including fire doors with selfclosers.
5. Each apartment shall have access to (2) separate, remote and approved means of egress. A single exit is acceptable when it exits directly from the apartment to the building exterior with no communications to other apartment units.
6. The boiler shall be protected by enclosing with one (1) hour fire rated construction including fire doors and ceiling, or by providing automatic extinguishment. Sprinkler piping serving not more than six sprinklers may be connected to a domestic water supply system having a capacity sufficient to provide 0.15 gallons per minute, per square foot of floor throughout the entire area. An INDICATING shut-off valve shall be installed in an accessible locations between the sprinkler and the connection to the domestic water supply. Minimum pipe size shall be 3/4 inch copper or 1 inch steel. Maximum coverage area of a residential sprinkler is 144 square feet per sprinkler.
7. Every sleeping room below the fourth story in buildings of Use Groups R and I-1 shall have at least one operable window or exterior door approved for emergency egress or rescue. The units must be operable from the inside opening without the use of special knowledge or separate tools. Where windows are provided as a means of egress or rescue, they shall have a sill height not more than 44 inches (1118 mm) above the floor. All egress or rescue windows from sleeping room must have minimum net clear opening height dimension shall be 24 inches (610 mm). The minimum net clear opening width dimension shall be 20 inches (508 mm), and a minimum net clear opening of 5.7 sq.ft.
8. This permit does not preclude the applicant from meeting applicable Federal & State laws and City Licenses.

-over-

9. All single and multiple station smoke detectors shall be of an approved type and shall be installed in accordance with the provisions of the building code 919.3.2 (BOCA National Building Code 1993), and NFPA 101 Chapter 18 & 19. (smoke detectors shall be installed and maintained at the following locations):

1. In the immediate vicinity of bedrooms
2. In all bedrooms
3. In each story within a dwelling unit, including basements

10. Private garages located beneath habitable rooms in occupancies in Use Group R-1, R-2, R-3 or I-1 shall be separated from adjacent interior spaces by Fire Partitions and floor/ceiling assembly ;lies which are constructed with not less than 1-hour fire resisting rating. Private garages attached side-by-side to rooms in the above occupancies shall be completely separated from the interior spaces and the attic area by means of 1/2 inch gypsum board or the equivalent applied to the garage side. (Chapter 4 section 407.0 of the BOCA/1993).

11. Guardrails & Handrails -- A guardrail system is a system of building components located near the open sides of elevated walking surfaces for the purpose of minimizing the possibility of an accidental fall from the walking surface to the lower level. Minimum height all Use Group 42", except Use Group R which is 36". In occupancies in Use Group A, B, H-4, I1, I-2 M and R and public garages and open parking structures, open guards shall have balusters or be of solid material such that a sphere with a diameter of 4" cannot pass through any opening. Guards shall not have an ornamental pattern that would provide a ladder effect.

12. All exit signs, lights and means of egress lighting shall be done in accordance with Chapter 10, section & subsections 1023. & 1024.0 of the City's building code (The BOCA National Building Code/1993).

13. Stair construction in Use Group R-3, R-4 is a minimum of 9" tread and 8-1/4" maximum rise.

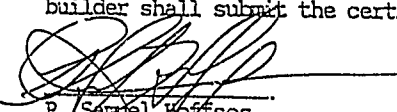

14. Headroom in habitable space is a minimum of 7'6".

15. The minimum headroom in all parts of a stairway shall not be less than 80 inches.

16. All construction and demolition debris must be disposed at the City's authorized reclamation site. The fee rate is attached. Proof of such disposal must be furnished to the office of Inspection Services before final certificate or occupancy is issued or demolition permit is granted.

17. Section 25-135 of the Municipal Code for the City of Portland states: "No person or utility shall be granted a permit to excavate or open any street or sidewalk from the time of November 15 of each year to April 15 of the following year".

18. The builder of a facility to which Section 4594-C of the Maine State Human Rights Act, Title 5 MRSA refers, shall obtain a certification from a design professional that the plans of the facility meet the standards of construction required by this section. Prior to commencing construction of the facility, the builder shall submit the certification to the Division of Inspection Services.
