NOTIFICATION BEFORE LATHING OR CLOSING IS WAIVED  
SECTION NOT COMPLETED

AP 455 Allen Avenue-I

April 30, 1948

Mr. Norman W. Durost  
455 Allen Avenue  
Portland, Maine

Subject: Permit for finishing off three bedrooms  
in second story of old stable now used for  
garage and storage at 455 Allen Avenue

Dear Sir:

The Building Code requires better framing for buildings used for living quarters than it does for accessory buildings such as stables and garages. Thus, while the building in which you propose to finish off several rooms satisfies Building Code requirements for the purpose for which it has been used up to this time, the framing does not come up to the standards set for buildings to be occupied for dwelling house purposes.

In order to bring the framing up to required standards, it will be necessary to do the following:

1. Provide extra 2x4 studs in the outside walls in both stories so that the spacing no where will exceed 16" from center to center. Any new or existing window openings in the second story must be provided with double 2x4 headers and jack studs.

2. Provide extra 2x6 floor timbers halfway between the existing ones in the second floor framing, thus making the spacing about 12" on centers.

3. Properly support the existing 4x6 girder carrying second floor joists at the center of the building, which is now very much overloaded on the span between supports. This may be done either by providing proper posts at frequent enough intervals for the 4x6 girder to work out or by providing a partition of 2x4 studs 16" on centers the full length of the building beneath the girder under second floor. In either case an investigation will have to be made to determine what strengthening of the first floor framing may be necessary to take care of the added loads thus placed upon it.

4. Since the new rooms in the second story are required to be cut off from the garage use in the first story, either the entire ceiling of the first story must be covered with the 3/8" asbestos board in which case the stairway would have to be enclosed with partitions covered with the same material and with a self-closing fire resistant door in the opening leading to it or, if the partition is provided under the girder, only the ceiling over the side of the partition where the automobile is to be stored and the garage side of the partition need be covered with the protection. If a door is to be provided in the partition, it will have to be a standard fire resistant door.

Therefore, before we can issue any permit for the work, we shall need to know just how you propose to meet Building Code requirements. You must provide a framing plan of the first floor showing the sills and girder and their supports. If additional supports are necessary, they are required to be masonry piers rather than wood posts as are existing beneath the building, because the building is more than 1 1/2 stories high.

Very truly yours,

Inspector of Buildings

AJS/S

AP 455 Allen Avenue-1

April 20, 1948

Mr. Norman W. Durost  
455 Allen Avenue  
Portland, Maine

Subject: Permit for demolition of  
shed on rear of dwelling and  
building of one-story open porch  
in same location at 455 Allen Ave.

Dear Sir:

The permit for the above work is issued herewith subject to the following:

1. The 2x6 floor timbers, 16" on centers on a 12' span will not figure out to carry the live load of 40 pounds per square foot required by the Building Code. They must be spaced no more than 12" on centers or 2x3's, 16" on centers, must be used instead.

2. Spacing of cedar posts beneath the 2x6 sills is given in application as three feet. If this is not the spacing to be followed, no work should be started until the spacing to be used has been approved by this office.

3. The floor timbers are required to be supported on top of the sills, which must be all one piece in cross section, or to be notched over no less than 2x3 nailing strips spiked to the sides of the sills.

Very truly yours,

Inspector of Buildings

AJS/S

ADDRESS: Mr. Lee Anderson  
455 Allen Avenue  
Portland, ME 04103

Dear Sir:

Your application to construct addition between existing barn and dwelling has been reviewed and a permit is herewith issued subject to the following requirement(s):

1. The foundation must be 8" frost wall (minimum) 4' below grade.
2. This addition is to be used in conjunction with the existing dwelling and not to become an additional dwelling unit.
3. Please call this office before placing foundation for inspection.

If you have any questions regarding these requirement(s), please do not hesitate to contact this office.

Sincerely,

P. Samuel Hoffses  
Chief, Inspection Services

RE: 455 Allen Avenue - addition

Dear Mr. Anderson:

Recent inspection of the above property revealed foundation work in progress on an addition to the rear of the dwelling at this address.

To date, no building permit has been issued for this work, and I am therefore issuing a STOP WORK ORDER on this job in accordance with Section 118.1 of the 1987 BOCA National Building Code.

No work may continue on this job until such time as a permit has been issued and a STOP WORK ORDER removal fee has been paid in this office.

Please contact me at 775-5451, ext. 376 between 8-8:30 a.m. or 3-3:30 p.m. Monday through Friday if you have any questions regarding this.

Sincerely,

Kathleen A. Taylor  
Code Enforcement Officer
