August 23, 1943

Mr. Walter H. Libby,
34 Dalton St.
Mrs. Elvie Trouvalis,
24 Berwick St.

Subject: Application for Building Permit to Cover
Construction of Enlarged Piazza and a Dormer
Window on the Dwelling House at 24 Berwick St.

Dear Sir and Madam:

The Building Law directs that I shall have sufficient information on the application and on plans of such a job as yours that I can tell that the Building Code is to be complied with before the permit is issued.

As to the piazza, the information is so confusing as to foundation spacing and framing and so contradictory as between that on the application and that on the sketch, that I am unable to tell what is proposed and whether or not the work would comply with the law.

As to the dormer window, that is no information as to which side of the house, or front or rear it is proposed, nor the distance from the face of the proposed dormer to the nearest property line, no data as to shape of roof, and almost none as to framing of dormer, adjusting the roof frame of the house, doubling existing rafters, etc.

It is necessary that some competent person make a clear plan to scale of both piazza and dormer, showing foundations and correct locations of them, how deep below surface of ground, how high above, anchorage of sill to piers, all sills, floor joists, roof joists, beams supporting outside ends of roof joists, location and size of posts, girders under floor joists, if any, with the direction in which they run, their size, spacing and spans.

Similar information should be shown on a plan of the dormer, excluding of course foundation, but including adjustment and strengthening of present roof framing to accommodate the dormer.

It is, of course, unlawful for you to start any of this work until the permit card is actually in your possession and posted on the premises.

Very truly yours,

Warren D. ...

Inspector of Buildings.
