Notice: This certificate identifies lawful use of building or premises, and ought to be transferred from owner to owner when property changes hands. Copy will be furnished to owner or lessee for one dollar.

December 9, 1958

FU-12/12/58- McU

AF 1108 Washington Ave.-Gas-fired^{hot} water heater installed in
connection with proposed beauty parlor
in basement

Mr. Alan B. Rich
205 Ludlow Street

cc to: Mr. Armand A. Folito
1188 Washington Avenue

Dear Mr. Rich:

Application having been made for a permit to change the use of a part of the basement at 1188 Washington Avenue to a beauty parlor, an inspector from this office found upon making preliminary inspection that an automatic gas-fired hot water heater had been installed in the basement a few weeks or a few months ago, and we have been unable to find from our records that the permit for the installation required under the Building Code had been procured.

It appears that the combination heater and tank was purchased from the Portland Gas Light Company, but we have been told that you were the installer of it, including the gas supply pipes and connection.

If that is the true situation, probably you secured a plumbing permit from the Health Department. Whether you are aware of it or not, however, in addition to the plumbing permit, a permit from this department is required before such an installation is commenced.

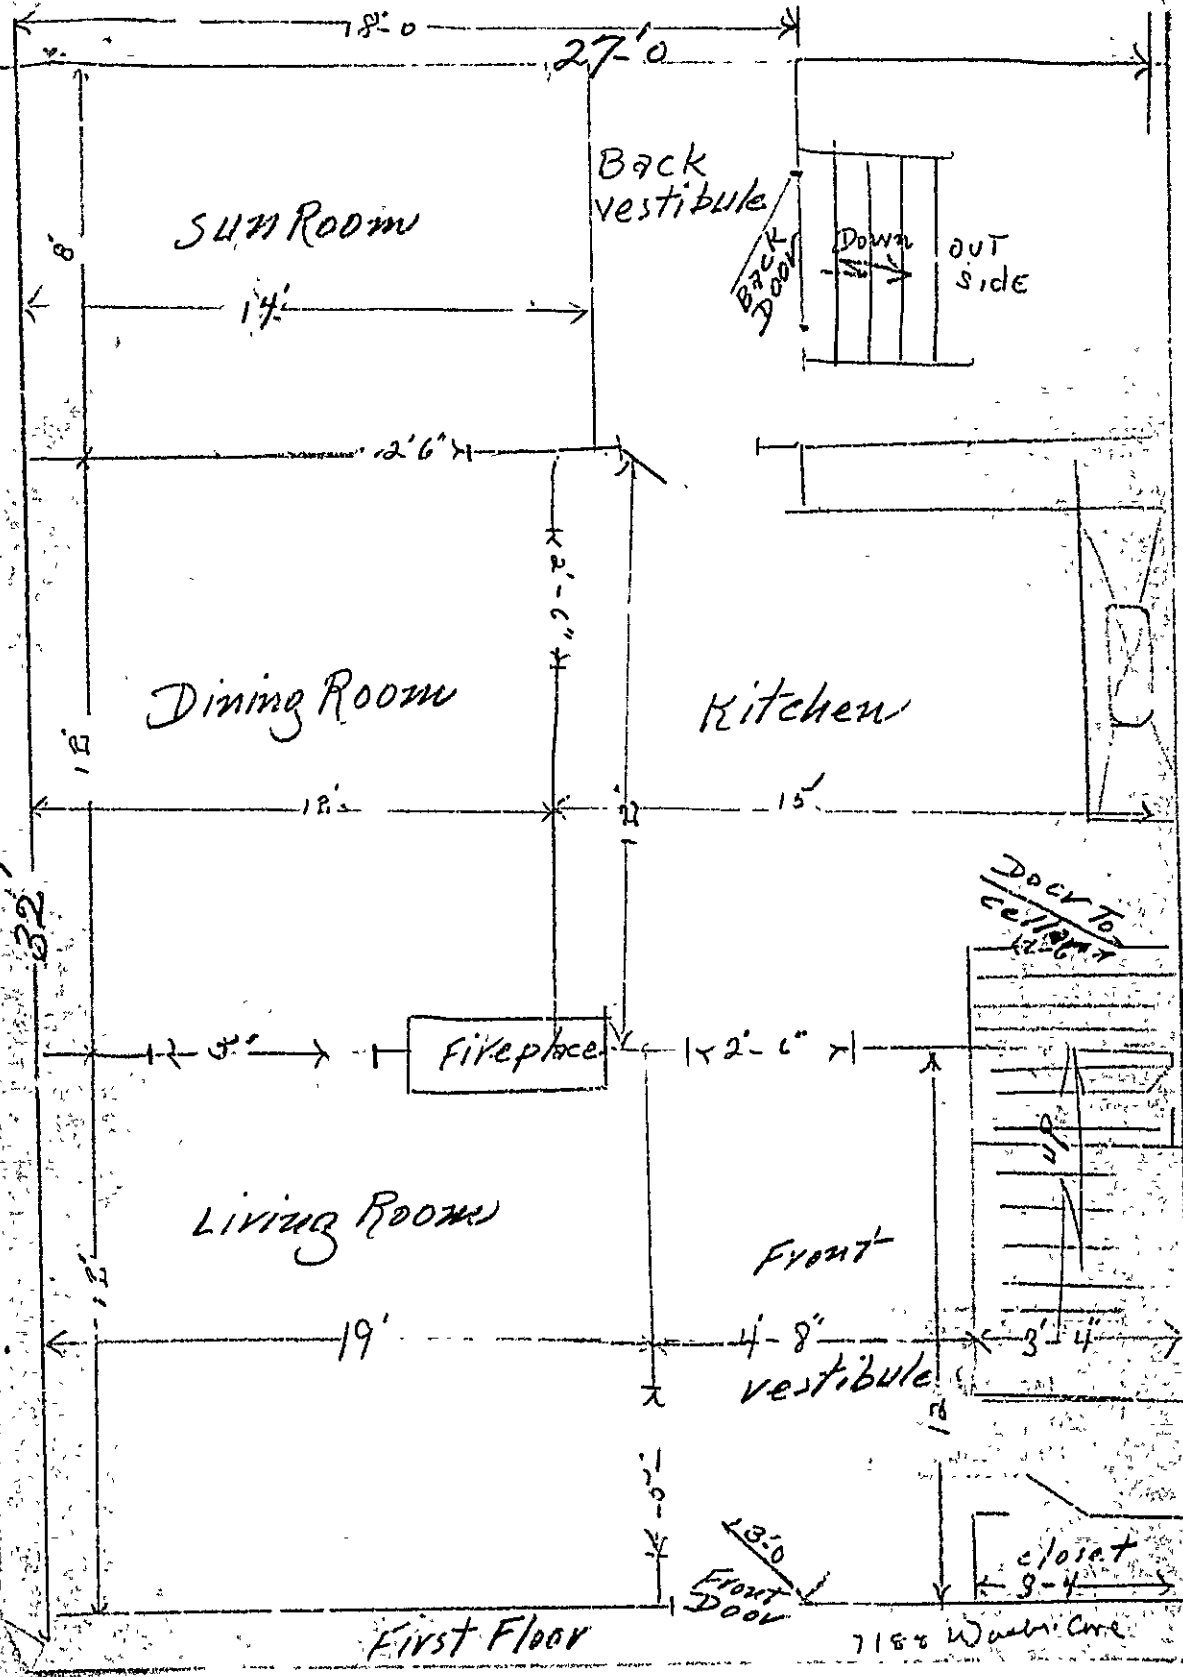

If you are not the one who connected up the gas supply and thus made the appliance operative, please notify this office immediately, so that we may contact the party who actually did this work. If you are the one who connected up the gas supply to the appliance, it is obvious that you did so in violation of the Building Code in that you had no permit for it. In that case we shall expect you to apply for the belated permit with full information before the close of business on Friday, Dec. 12, 1958.

Before applying for such a permit, you should find out the name of the manufacturer and the model number of the appliance from the Portland Gas Light Company and also find out whether or not the appliance is assuredly equipped with a safety device whereby, if the pilot light should be extinguished from any cause, all gas supply would be automatically cut off from the burner--thus to prevent raw gas rushing up into the chimney flue and perhaps be ignited with disastrous results when the oil burner comes on. If the appliance is already so equipped, you should so indicate on the application for the permit. If the appliance is not so equipped, you will have to make arrangements to supply this safety device, and should so indicate on the application for the belated permit.

Very truly yours,

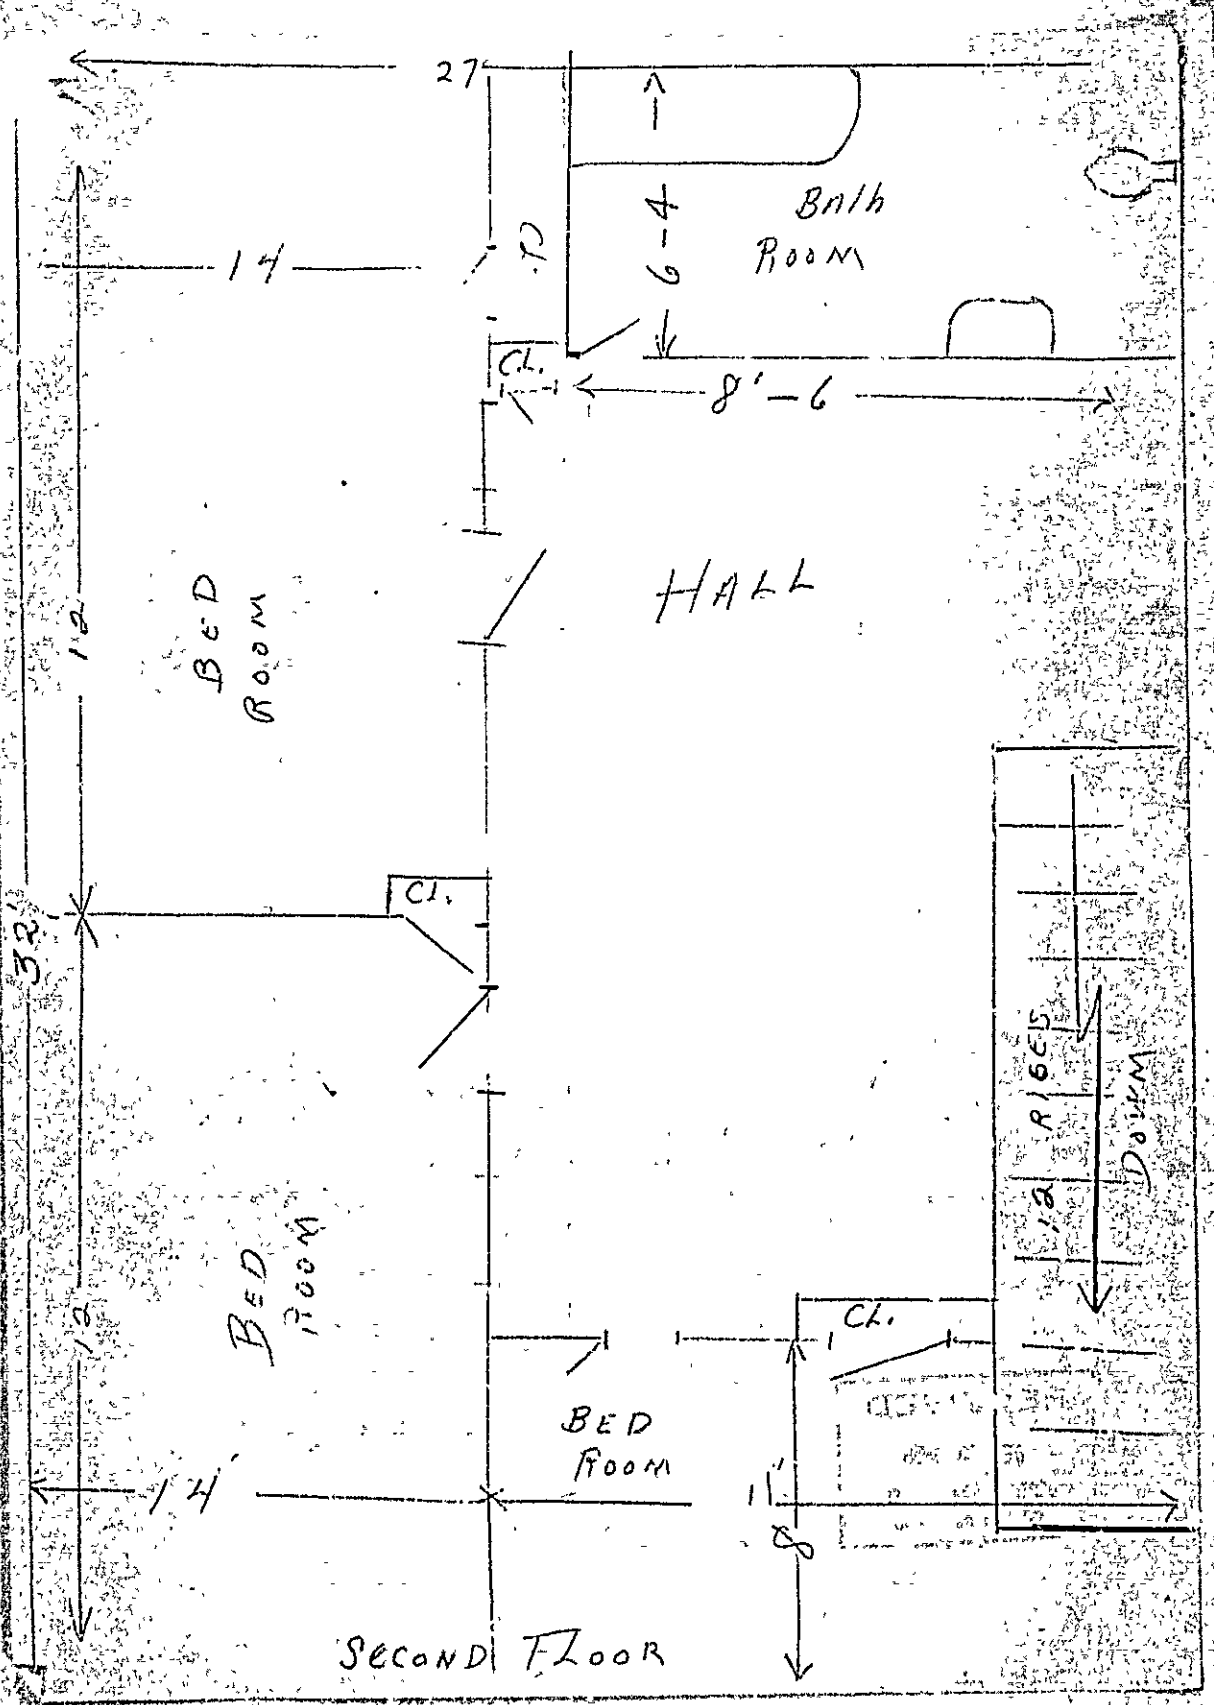

WMcDm
