Memorandum from Department of Building Inspection, Portland, Maine

Police's Landing, Island Avenue, Long Island (Woodward)—Construction of addition to
corner window on shore side of summer cottage for Mr. Woodward by Edward
A. Dugan, contractor—12/23/46

To Contractor & Owner:

Permit is issued based on the building being a summer cottage only and to be
contained as such instead of being a dwelling house as indicated originally on the
application. If the building were being converted from a summer cottage to a year
round dwelling, we should need full information about the framing of the building
throughout because so many of the cottages are too light framing to take the dead
and live loads incident to year-round use.

No information has been given as to the size, spacing or spans of the present
rafters on which the new rafters for extensions of the dormer are to rest their bearing.
Therefore we are unable to check the strength of these existing rafters. This is of
importance to the owner, however, and we presume that the contractor will make sure
that these rafters are strong enough and closely enough spaced to fully support the
load from the inside ends of the new rafters.

The new 2x4 rafters on spans of 6 feet and 24 inches from center to center will
not figure out strong enough. They would if spaced 12 inches from center to center,
but I suppose the present rafters on which they are to bear are already spaced 24
inches from center to center. Of course, 2x6's would work out all right on 24 inches
center to center.

Mr. Hunter said
he had already
started this rubble
and he was going
to break up something
for it. He is going
to sell some things
at the market. When I
asked him what size
holes he was going
to use, he said 12x7.
I don't know whether
he has them already
or not.

They have decided
to remove the new
work they have started
and restore the old
work. Richard of
