Memorandum from Department of Building Inspection, Portland, Maine

Off Fern Ave., Long Island 100-D-20--To change chimney from an inside
to an outside chimney for and by Frank H. Griffin--October 2, 1953

Amendment #1 to permit 53/708 covering construction of an outside chimney in place of the inside one originally planned is issued herewith. It should be noted that the wall of the chimney is required to be kept at least one inch away from the outside of the wooden wall of the building except where the smokepipe is to enter it, where the brickwork is required to be corbelled so as to extend through the wall to the inside face of the studding. Amendment is issued on the basis that such construction will be provided.

HEALTH DEPARTMENT

To: Mr. Warren McDonald
Building Inspector
DATE: May 7, 1953
From: Edward W. Colby, M. D., Health Director
Norman M. Winch, Public Health Engineer
Subject: Building Permit on Fern Avenue, Long Island, Maine.

We have examined the proposed location of this cottage, planned to be built on Fern Avenue, Long Island. Mr. Griffin has informed us that he plans to use a chemical toilet. We are going to approve this method of sewage disposal and recommend that a Building Permit be issued.

Very truly yours,

Edward W. Colby

Health Director

by

Norman M. Winch
Norman M. Winch, C. E.
Public Health Engineer

NM.:beb

CC: Frank H Griffin

Note: We are aware that this installation will not be in conformity with the code, but, after surveying the situation and finding that many people are using chemical toilets and there being no public water supply, there doesn't seem to be hardly any other solution to this problem. We feel that no harm will be done in permitting Mr. Griffin to build his small cottage.

Furthermore, Sec. 184, Chapter 22, of the Revised Statutes relating to plumbing specifically exempts private premises from the code, when no public water supply is available.

RECEIVED

MAY 8 1953

DEPT. OF BLD'G. INSP.
CITY OF PORTLAND

May 1, 1953

Mr. Frank H. Griffin
Long Island
Maine

Dear Mr. Griffin:

We have received your note, stating that you are planning to use a chemical toilet in the cottage you propose to construct on Fern Avenue, Long Island.

We must inform you that the installation of a chemical toilet or the construction of an outdoor privy is banned by City Ordinances. The only method of sewage disposal, which we can approve, is by means of a septic tank and absorption bed. Prior to approving the use of a septic tank system, a percolation test must be made in the soil in order to determine whether a septic tank system will work. If you wish to have a percolation test made, kindly advise this office and we shall assist you.

If you have any questions, please do not hesitate to call this office.

Very truly yours,

Edward M. Cobb, M. D.
Health Director

Copy to: Health Officer

Mr. Frank H. Griffin,
Long Island,
Portland, Maine

Dear Mr. Griffin:

Application today by Arthur Fox to construct a cottage at Fern Avenue, Long Island for you indicates that no connection is possible to a public sewer.

The Building Code directs, where connection to a public sewer is not possible, that the proposed method of sewage disposal must be approved by the Health Officer before any building permit is issued.

That the Health Department may be aware of the proposed method of sewage disposal, you should explain to Sanitary Engineer Norman W. Park just what you intend to use.

Very truly yours,

HMcD/H

Signature of owner Marion W. Bucheltz

Copy to Mrs. Marion Bucholtz

November 14, 1934

117A-1

Mr. Johnson,
Long Island,
Portland, Maine

Dear Sirs:

With reference again to the dwelling house owned by Marion Bucholtz on Fern Avenue, Long Island, I have personally examined the part of the building where the partition has been removed without first securing a building permit.

It seems certain that this 4x4, which you have put in to take the place of the partition, will be called upon to support the floor timbers of the second floor and also to support the plastered partition above it. Under those circumstances a 4x4 is entirely inadequate. This timber will be called upon to support slightly over two tons of weight and because the 4x4 already shows considerable deflection.

It will be necessary for you to remove this 4x4 and to put in its place a 6x8 timber either of bona fide Douglas Fir or Long Leaf Southern Pine. This timber should be supported at both ends by 4x8. On the end of the timber toward the stairs, it will be necessary to provide a post in the cellar directly under the 6x8 girder, which is in the cellar, where the 4x8 post supporting the 6x8 will get its support.

It is now necessary for you to come to this office and apply for an amendment to the existing permit in the name of Mrs. Bucholtz to cover removing the partition and providing the girder and post in its place. We are holding you personally responsible for this partition and we expect you to apply for this amendment on or before December 1, 1934 and to have the work all completed before December 15, 1934.

Very truly yours,

Inspector of Buildings.

Kc/H

Copy to Mrs. Marion Bucholts

September 27, 1934

Files 84/1274-I

Mr. Harry Johnson,
Long Island,
Portland, Maine

Dear Sir:

An Inspector from this Office reports that a partition has been removed by the owner of the dwelling house owned by Marion Bucholts on Fern Avenue, Long Island, and that you have attempted to replace the partition with some sort of structural member.

This work was done without a permit and it is necessary for me to require that you come to this office on or before October 5th, 1934, and get this situation straightened out.

It appears likely that this partition which was removed was a bearing partition. If so, the structural member that you have put in its place is entirely inadequate. Before coming to the office you should determine just how much load, or how much of the second floor is supported at the place where the partition was taken out.

Very truly yours,

Inspector of Buildings.
